CYCAS is an architecture CAD tool. It allows you to study the architecture in full 3D and 2D. It has many functions and tools.

Among these are: - Drawing of many types of construction elements: 2D and 3D, and walls, floors, columns, beams, etc., that are a flexible framework for building. - Drawings of beams (2D and 3D) make it possible to construct them easily with different types of cross sections and shapes. - Constraint and phasing: allow users to add geometry as needed to achieve the final view you want. - Thumbnails: objects (2D and 3D), layers, slices, text and other basic elements are displayed as thumbnails that help you to build faster and have a better understanding of your work. - Archive: import and export of files in a variety of formats. -

Project management: project support, multiple projects, materials, sheet layouts, plans, 3D, 2D, BIM, etc. The toolbar of CYCAS is where you can find all of the options needed to view your projects. The following tools are shown: - Zoom: scroll and select the details you want to see. - Status bar: show you the status of your project: enabled or disabled. - 3D zoom: enable or disable the 3D Zoom. - 3D tools: arrows, modeling; etc. - Art: view and select your objects. - 2D tools: select objects, see the layer or make a sketch. - Tools: to specify the layout, add or move objects. - Settings: configuration of the tools, 2D/3D view mode, etc. The view of the project is done using the following: - View: there are three viewing options: 3D and 2D modes, and a variation with the screen separate 3D and 2D mode. - Models: show the 3D model of the project, as a Sketchup model, a 3D studio model or a BIM model. - Views: show different views of the project. There are several types of view. - Camera: the selection of angles and heights that allow you to visualize the project in 3D. - Materials: show which type of material is the project. - Effects: show the visual appearance of the objects in your project, using the options of the frame, intensity and the effect. - Thumbnails: show the 3 09e8f5149f
