HeavyMath Cam 3D [32/64bit]

---

## HeavyMath Cam 3D

Cam 3D (Cam Surfer) is a webcam program capable of recording stereo video and 3D red-cyan anaglyph video. Cam Surfer is designed to be easy to use and control. You can select a fixed focal length or custom length. Adjust the position or size of the capture area. You can adjust the zoom, brightness, contrast, hue, saturation, and gamma. Set the webcam resolution. Set the playback volume. Adjust the camera resolution. Set the IR filter position. Cam Surfer enables you to record in either the normal video or QuickTime format, or in the more powerful MOV format. Cam Surfer is designed to record 3D video in real time with zero lag. No need to go through the tedious anaglyph process, no need to process the video later. Cam Surfer records video from all types of webcams, not just one brand of camcorder. You can preview the camera feed on any window. You can flip, pan, and zoom the camera feed. Or play it back live. Cam Surfer only offers basic anaglyph options. No other cam features are available. To use Cam Surfer, you need a pair of red-cyan glasses. Cam Surfer itself is a rich library of webcam features. Cam Surfer is also capable of recording 3D still pictures. The "Capture Still" button makes it easy for you to take a snapshot of the recorded picture. \* RapidCam Pro with 5 Lens - with up to 85x zoom lens: capture any subject at up to 85x zoom and focus the picture instantly after capture. \* High Quality - 720p HD video and photos. \* Easy to Use - great control of the camera with the all new user interface. \* Built-in Canvibe - turns any camera into a light shake camera, compatible with all professional light shake camcorders. CamSurfer, also called CamSurfer PRO, is best cam software. CamSurfer is designed to record live video from your webcam at all time and to capture screenshots. The recorded video and screen capture are in MOV format and 30fps (30 frames per second). You can also capture still picture at 30fps and 5M sized, 12M sized, or 30M sized. You can set up the video record quality according to your needs. On Windows, CamSurfer uses Media Foundation (MFC) to record video, and uses DirectShow

## What's New In?

Turn on your webcam microphone, install the demo version, and HeavyMath Cam 3D takes charge. It will begin recording from both the webcam and microphone, producing a stereo 3D video for playback through any standard DVD player or home theater system. No more hunting through "odd" programs or website for the correct plug-in and configuration. HeavyMath Cam 3D can handle up to three webcams. You can even record two tracks at the same time. And the effects of the red-cyan stereo cam viewer appear to be real. Features: + Recruit at least one cam for recording (or you can record two or more cams simultaneously). + Listen to audio in foreground/background. + QuickStart: "Recording Recording..." screen is displayed when using my recorder. + Info screen. There are many function and method in the video file/task. + All recording file stored in PC. + Multiple function to be adjustment. + Sequenced, schedule and task can be set easily. + Two items of userfriendly program. New features in the upcoming version: + Higher fps rate + Stream to go() + Support of linux (debian, fedora, suse, mandriva and etc) + Support of multi webcams Download: Download Cam 3D Full Version download link below or via SITE-MITE. Please choose the right file from the links in the page (not the file number) for the right language. Download Server link: Download Server link is via this page. Please choose the right file from the links in the page (not the file number) for the right language. We don't open any server. Download is through our search engine ONLY. The download will go to your home directory or to a folder on the server. Please be sure it. (Note: server location is not same as this site) If you have not able to download the file, just click here, and it will be prompt the download directly to you. If you wish to report an issue, to give us a idea of what to improve next time, or to just to say thanks. Then: Please click the "File a Problem" link at the bottom of this page. It will then take you directly to our Support page

---
