Best of luck to your free YWJ/ROM hack tool. This tool has been very handy when i need some hacks on my YWJ. Please add feature to the New Hunter Class or take thing to add some works. I really don't want to log into the forums and ask for it.. please do it for your YWJ. Thank you. also add some features like apollo and some special attacks by iwz like finishing in SUPER or iwz freezing time like 1 sec and he can do so many thing that x1. Please add a feature of catching or destroying a certain amount of food creatures while the hunter shoots them. Also another thing im interested in would be being able to learn a hunter class in my house. This is probably the feature i ask for the most bc i cant wait to start my first long journey to save the universe. I'm also interested in the ability to be able to save a custom class so that i can have a class that suits my personal gameplay preferences. what I'd like to have would be the ability to move your hunter one direction after the last target was consumed, like this... I love the idea of the dogs. I would like to see some variety like them doing things that arent normal in the way of fighting like telling you that they found out about a alien base, they don't want to join. They can be very smart and have a lot of loyalty for you but still have there own agendas. I'd like to see someone put some more work into pvp, like players banding together to help each other defeat other players. If the dogs could surprise you, shoot at you while you're on the ground and make you shoot at them. I love the idea of the dogs. I would like to see some variety like them doing things that arent normal in the way of fighting like telling you that they found out about a alien base, they don't want to join.
