What's New In?

This app is for simplicity. It is simply a Windows Program that uses the 'net send' tool to send messages to any Windows Computer on your network. You can customize the subject, text, and the destination. It is simple. I have prepared the forms for you to help make your setup quick and simple. I have provided wizards to guide you through the setup process. Every setting in the program is easily changed. NetSend Win should work in any operating system that supports Windows 'Net Send' tool, like Win XP and Win 7. This program was designed to allow the use of your Windows Address Book which will then allow you to customize the messages that are sent to your friends and family. A simple way to send groups of messages at once using your Windows Address Book. This program is a free version of the full version, available for purchase. Features of NetSend Win: You can edit as much or as little of the message as you like. Add as many recipients as you like. Change the message subject. Change the message text. Change the file name (up to 15 characters). Change the file type. Add message to the specified folder. Customize the time for the message to be sent. Run the program and it will take you through the setup of the program. Change the way the message appears. Change the recievers field. Fully customizable! You can easily add the program to your Windows start-up using the built in Windows start menu. Customize the message order. Edit the default sent message. View the source code of the program. View the documentation. The source code of the program is available for download. The documentation is available for download as a PDF. License Information: This program is freeware! NetSend App License Information: I want you to be able to do whatever you like with the program. So I decided to make it Free for everyone. Please contact me if you find this program to be useful to you. Privacy Policy: If you wish to download and install the program, you are given permission to do so. If you wish to use this program on a network that is not the same computer you are using this program on you may not be able to download and install the program
