## Ocean Mail ID [Mac/Win]

This is a simple extension for Google Chrome that provides you with a handful of useful data about people who send you email messages. It can be used to learn more about them quickly and easily by displaying the sender's name, contact information (if available), associated website, social media profile shortcuts (if available) and also the last time they contacted you in an instant manner. A Chromium-based extension for Chrome – No configuration needed. Ocean Mail ID – Very Simple A browser-based extension that requires no manual configuration. It only takes up about 3 MB

---

of your hard disk space (though the settings panel is rather small). Ocean Mail ID Setup This extension comes pre-installed on the Google Chrome web store, so you don't need to do anything to have the setup process completed. How to install Ocean Mail ID? All you have to do is click the "Add to Chrome" button on the product's page on the Chrome web store and the installation process should run smoothly afterwards. When you launch Ocean Mail ID on your computer for the first time, you should see a small "welcome" screen on your screen and clicking on it should start the installation process. Update Ocean Mail ID Since this utility is a Chromium-based

---

extension, it's necessary to perform an update to make sure you're using the latest stable version of it. To do so, you can visit the Ocean Mail ID product page on the Chrome web store and hit the "Get the latest version" button that's placed above the "Get extension" button. Ocean Mail ID

**Functionality** Ocean Mail ID provides you with a handful of useful data about people who send you email messages. The key data fields include the sender's name, the email address, the website linked to the email address, social media profile shortcuts (if available), as well as the last time they contacted you.

**Sharing extension** You can easily share your contact details with the people who

---

send you email messages with Ocean Mail ID. To do so, you can select the message you want to share and the selected message will be placed in a copy-paste-friendly format. License Ocean Mail ID The license for this utility is free of charge. The product doesn't need to be an adware application and it doesn't collect any personal data about you, so the license shouldn't be an issue for you. It's also possible to install the Ocean Mail ID extension without having to go through the Google Chrome web

**What's New in the Ocean Mail ID?**

---

â A useful extension to get useful information about your mail contacts with no configuration whatsoeverâ Uses the API provided by Google to provide a list of contact names, email addresses, websites and social media profile for your recipientsâ An extension for the Google Chrome web browserâ No configuration required after installation â Requires Chrome to be installed free of charge, but it's supported to install. Price: Free Download Sometimes it's vital to create a back up of a DVD without any additional efforts. There're a lot of reasons for that and the most common one is security. You won't want to waste your time going through some

---

complex or lengthy process in order to retrieve the original contents of a damaged DVD. The good news is that with a little bit of practice and some good software, you'll be able to back up your DVD and other optical discs in no time. Below you can find some of the best tools on the market that you can use in your journey to create a backup of a disc.

### Magix Discs Decryptor

The Magix Discs Decryptor is one of the best tools on the market for recovering CD and DVD data that might have been accidentally deleted. This tool can decrypt nearly any type of DVD, CD, audio CD or even a Blu-ray disc, without any kind of modifications to the disc itself. This is achieved by extracting the

---

encrypted data from the disc. In addition to the useful data extraction feature, this tool also supports direct file creation and recovery from disc content. All of this can be done from the command line. Apexus DVD Ripper In spite of being a solid one-trick-wonders, the Apexus DVD Ripper is still a very useful tool that can be used to create a backup of the contents of a disc. The disc backup procedure usually involves the use of the image of the original disc to create a DVD disc that can be played back on any DVD player. Thus, this is a good option to backup the contents of discs that come with older players. The main downside of this tool is that it only works for

---

DVD-9 and DVD-5 discs. CD Clone PRO The CD Clone PRO is a standalone tool for performing a disc backup. This tool is very similar to the Apexus DVD Ripper, but it supports DVD-9 and DVD-5 discs. One of the most important characteristics of this tool is

---

**System Requirements For Ocean Mail ID:**

Laptop/Desktop: AMD or INTEL Processor
