I am running a program that is "implementing" a Binary Search Tree. At the very first stage of the program, I am trying to call "insertnode" function by setting the node to NULL and then adding a node through the "insertnode" function. The output of the program is shown below What is the reason behind the movement of the pointer? How is it possible that the pointer goes through the node and then stops at the 50% of the node, if the root is NULL? #include #include #include 09e8f5149f
