UPX Manager

----- UPX Manager is a tool specially designed to offer you a tool that allows you to execute various UPX command line arguments through a Graphical User Interface. For example, instead of executing multiple command line arguments as in this case: ----- %UPX -r -f -p -F -L -s -v \ --adjust-pcc-paths --cpp-linkage=dll -- --cpp-name \ --compiler=g++ -o

----- This new tool allows you to execute a single command line argument (with the help of the Graphical User Interface), or any combination of the above arguments. Simple Setup: ----- DOWNLOAD & INSTALL Run the file "UPX_Manager_setup.exe" and follow the instructions to complete the installation. Once finished, the application will be added to the Program's menu. To remove the application from the menu, open the menu (Windows XP) and select Application, then click the UPX Manager item. Select Exit. WINDOWS XP:

----- You will have to double click the "UPX_Manager_setup.exe" file to run the program. OR You can also simply run the program from the directory where the "UPX_Manager_setup.exe" file is located. Please note that you will have to manually add the directory where the file "UPX_Manager_setup.exe" is located to your system's "PATH" variable, for example, if the directory where the "UPX_Manager_setup.exe" file is located is on the desktop, you will have to right click on the desktop and then click on the properties. Then, locate the tab "Advanced". Then, locate the "Path" variable and add the "C:\WINDOWS\system32" directory where the "UPX_Manager_setup.exe" file is located. Be sure you do this for all users that may want to run the program, so you will be able to copy the "UPX_Manager
