A: The answer is simply: the first line (in the first case) matches exactly and the second one has only a word to be matched, wich is not there. try this: preg_match('/(.*?) [\s\S]{1,}(.*)/', \$foo, \$bar); or: preg_match('/(.*)(\s\S{1,})*/', \$foo, \$bar); if you have second line as a row - like here: [?????? ?????? ?????????? ?? ?????? ?????? ?????????? ? ?????? ??????????] you just have to match the second line: preg_match('/([?????? ?????? ?????????? ?? ?????? ?????? ?????????? ? ?????? ??????????]) (.*)/', \$foo, \$bar); Our Journal Innovate Utah is a statewide learning collaborative focused on quality improvement, and reaching all Utah children with effective teaching strategies, instructional support, and learner-centered curriculum. Innovate Utah is bringing together classroom teachers and school-based educators for training and quality improvement focused on the full-scope principles of the Common Core State Standards and on the Importance of Teaching for Students to Learn. To learn more about Innovate Utah, visit our webpage. Spring 2012 Meeting Information Check out the meeting schedule for Spring 2012 Innovate Utah online meetings. September 22-24 Dallas, Texas Visit our website to see how the 2011-2012 Model Core is aligned with the Texas Essential Knowledge and Skills and to learn more about the 2012-2013 Model Core. October 6-8 St Louis, Missouri f30f4ceada
