How to put fit for life dual trac 20 together. 2) Put the motor in place. This is a retrospective chart review of 195 consecutive patients treated with LympHo-Laser therapy (LLT) for MSK pain. The authors examined the efficacy, safety and complications in patients treated with LympHo-Laser therapy (LLT) N = 195 Patients with MSK pain were treated with LLT with the infrared wavelength laser from February 2002 to April 2008. Outcomes assessed included relief of pain, improved activity level, and improved sleep quality. The overlying hypothesis is that LLT would have an impact on MSK pain. Over an average period of 3.9 months of follow-up, the authors identified no safety specific concern. The success rate after one treatment for MSK pain, including bony (e.g., ankle and knee pain), soft tissue (e.g., joint capsule) and neural (e.g., neurologic) pain was 92.6%, and the success rate after repeat treatments was 88.1%. Conclusion: LLT is a safe, effective and alternative treatment for MSK pain.
