The build succeeds in TeamCity on every build, but the package is never deployed to my staging server. I'm assuming the package is a signed binary, so the.pfx file must be placed in the build's artifacts folder. From what I've read, TeamCity doesn't allow for debugging of binaries, so I can't debug the project itself or the compiled assembly. My only idea is to compile the project in Debug mode, but this seems like a last-ditch method and I'm hoping there's a better way. A: According to the TeamCity documentation: The target
