The Windows installer will create a Start menu item on the desktop for that application, but it is also available as a command line utility. If you do not use the Windows installer, you will have to go to the folder containing your modified files to run the command, robocopy /MOV For a portability attempt, you could use PowerShell. A: It is a utility that can be used to copy files across. It is a open source (GPL) program. Using xcopy.exe is also an option. In semiconductor device fabrication processes, a semiconductor wafer (also referred to as a substrate or a semiconductor base) may be cleaned by immersing it in a chemical cleaning process, with wash solution supplied. A substrate, such as a silicon wafer used in semiconductor manufacturing, may be cleaned in a cleaning apparatus by immersing it in a cleaning tank for the solution. For example, if a chemical mechanical polishing apparatus is used to polish a silicon wafer, the surface of the silicon wafer may be immersed in a chemical solution, such as a polishing slurry, during the chemical mechanical polishing process. The cleaning apparatus may supply the chemical solution or wash solution to the cleaning tank, and the chemical solution or wash solution may be supplied onto a substrate in the cleaning tank. The chemicals and wash solutions used in the cleaning process may be expensive, and the chemicals and wash solutions are typically reused in the cleaning process. The cleaning apparatus includes a portion referred to as a wafer platter on which the wafer is rested. In some conventional cleaning

My UIView has a WebView component in it, but that webview height changes depending on the text content. I tried to use this method: - (void)webViewDidFinishLoad:(UIWebView \*)webView { float height = webView.scrollView.contentSize.height; float scaledHeight = height \* 0.85; float scaledWidth = height \* 0.85; webView.scrollView.contentSize = CGSizeMake(scaledWidth, scaledHeight); } but it does not seem to work. A: I had similar requirement and used this method: - (void)webViewDidFinishLoad:(UIWebView \*)webView { float height = webView.scrollView.contentSize.height; float scaledHeight = height \* 0.85; float scaledWidth = height \* 0.85; [self setWebViewContentHeight:scaledHeight]; } - (void)setWebViewContentHeight:(float)scaledHeight { float h = (height \* scaledHeight); float x = 0.0f; float y = 0.0f; [self.webView setFrame:CGRectMake(x, y, webView.frame.size.width, h)]; } Basically this scales the webview to a width of 0.85 X height. What you might want to do is get the webView's width and height and set it to 0.85 \* height, and width. Q: Intersection of UITableView with UIScrollView I am trying to build a tableView inside
