Visual C++ 6.0 Standard Edition Visual Studio 6 (Enterprise and Pro) and 97. Windows NT Word 97. I also read that if you take the upgrade CD key and add ... Read more Q: I uninstalled Visual C++ 2005 (Build 14562) and tried to install a newer build (Build 14564) ... Unfortunately, I can't install it on my computer. I already installed the new version, but it didn't work. Do I need to install it correctly or can I use the old version? Now my question: is it possible that this Thank you. I have Visual C++ 2005 (Build 14562) and a newer version (Build 14564) in Windows 7
