**Capturix ScanShare [Latest 2022]**

# Capturix ScanShare Crack Keygen is a software solution for users who need to turn an ordinary TWAIN compliant scanning machine to a network scanner for office purposes. Share your

scanner with everyone in the office You can use this application to allow access to your scanning machine. Capturix ScanShare enables users to share a scanner over the local network and restrict access to it by allowing only hand-picked IP addresses to use it. Furthermore, users can create a password to protect their configuration. The scanner can be reserved for a certain period of time, in order for users to have privileged access to it

whenever they require it. In addition to this, the application can be set to save a copy of all scanned images to a specified folder as a means of backing up files. Configure your scanner to send items to e-mail or server Capturix ScanShare provides a 'Scan2Email' feature, enabling users to export their items to an e-mail recipient or a SMTP server. A downside to this perk is that users can export images either as JPEG or

PDF format; the other formats supported by the application (BMP, PNG or TIF) are not available for this type of export. Keep track of the scanner's activity and manage export options The application creates activity logs of all operations, allowing users to get an overview of how the scanner is used and by whom. Users are able to select the image type for their scans (black and white, greyscale or color), and you

can size results as letter, A5 and A4. Capturix ScanShare also supports copying machines, allowing users to select from available copiers, restrict the maximum number of copies and track activity. This feature is useful for users who have multi-functional machines at their disposal and want to use them at their maximum potential. In conclusion, you can use this comprehensive application to share all types of scanning and copying

machines in an office
environment. Capturix
ScanShare is well designed
and provides numerous
features and options.
