latter of which has a potency of 5 g. The problem is, that the first assumption that $A \cdot E \cdot T$ is a stable equilibrium does not, appear to be valid; the reaction direction is such that the concentration of E is decreasing whereas that of T is increasing. In this work, the isomeric trifluoroacetic acid, CF_3SO_2OH , was synthesized in good yields by a Sn-promoted Hofmann rearrangement of trifluoroacetyl anions. Acids with low pKa values are also shown to be nucleophiles, as evidenced by the ability of tenatox to introduce a single fluorine atom into CF_3SO_2OH . Octet technique was utilized to study the mechanism of the reaction and the

stoichiometry of the reaction was established by an isotope effect experiment. Excellent visualization of the reaction was achieved by NMR spectroscopy. Rumpal Mbx gps

Welcome to the IUPAC-IUB Joint Commission on Chemical Nomenclature and The IUPAC Compendium of Chemical Terminology, the principal reference works in the field of chemistry. In 2005, a report by the IPCC, the Intergovernmental Panel on Climate Change, concluded that climate change is occurring due to human activities. This letter to the editor is an attack on that report because it has been used by proponents of a status quo to deny the existence of climate change. The
