Help appreciated. A: Hint. with $u:=x+1$: $$\int\frac{\arctan(x)}{x^2+x+1}dx=\int\frac{\arctan\left(\frac{x}{1+u}\right)}{\left(\frac{x}{1+u}\right)^2+\left(\frac{x}{1+u}\right)+1}dx$$ after simplification, $$=\int\frac{\arctan\left(\frac{x}{1+u}\right)}{\left(\frac{x}{1+u}\right)^2+\left(\frac{1}{1+u}\right)^2}dx=\int\frac{du}{(1+u)^2\cdot\frac{\arctan\left(\frac{x}{1+u}\right)}{x^2/(1+u)^2+1}+1}$$. The present invention relates to a trunnion for

adjusting a harmonic drive, and in particular a trunnion adapted to permit movement of a shaft with respect to a housing without loosening the connection of the shaft with the housing. Harmonic drives, sometimes called inchworm drives, are well known in the art. In a harmonic drive, a carrier is oscillated around a fixed point in a circular path by imparting a rapid rotational movement to a drive shaft. The drive shaft is normally connected by

a ball joint to a nosepiece connected to the carrier. As the drive shaft is turned, it moves the carrier through a circular path about the fixed point. The motion of the carrier is

What's New Version 1.0.1: Added menu bar, the date filter is removed, the folder view is added,[Quality assessment of axillary lymph node dissection]. Axillary lymph node dissection (ALND) is frequently performed at certain stages of breast cancer for the precise staging and for the treatment of clinically negative lymph nodes. However, ALND has a high rate of complications, including nerve

damage. Although the therapeutic effect on breast cancer patients is important, the quality of ALND itself is equally important. The present article reviews the national guidelines and international guideline, and discusses the quality of ALND as well as the associated quality management.One of the best arguments for the war in Afghanistan was that it was less costly than Iraq. Now we have the real numbers (pdf) from the Congressional Budget Office (CBO),

and it turns out the costs of the war are almost exactly the same. The main difference is that the United States has spent $8.8 billion on the war in Iraq. The numbers for Afghanistan come from CBO's Costs of War project, which is broken down by type of cost and shows the domestic costs of war over the past 15 years or so. The US total is $11.5 billion, about the same as Iraq. But the key number, in terms of determining whether Afghanistan was worth it, is the

difference between the net benefit of the war and the total cost of the war: about $1.9 billion. By far the majority of that ($1.6 billion) is the cost of health care in the US for wounds caused by the war. That's hardly a major benefit of the war. Moreover, it's not included in the CBO estimate. So Afghanistan actually cost less than Iraq did, in terms of both US domestic costs and the cost of the war as a whole. Overall, a major reason the US can't afford to continue this war is that

the costs have exceeded the benefits in terms of what has happened in Iraq. If we have the same problem in Afghanistan, then that would be a pretty good justification for not continuing this war. If we actually have a very small benefit, then it might be worth it. 09e8f5149f

Just a long time ago the Opera, a browser famous for its speed and efficiency, existed as a safe and stable alternative to the Chrome. However, as the years went by, it started to slow down, becoming bloated and cumbersome. Opera then started to get neglected, and when the Parity crisis happened, it was no surprise that it gained a bad reputation in the market.

Among the users who still opted to use Opera, some had a wish to have a history menu that was similar to Chrome's. The only problem was that they didn't have the access to create a menu through the interface, so they had to wait for extensions to implement the idea. However, times have changed, and with V7 History, you'll have access to a fast, simple and compatible history menu through the Opera's sidebar. Read more about the history and search function in

our Opera V7 History review. Üterse Dämät Üterse ka vihmaa I don't like the fact that it's in my sidebar and that it's not user-friendly to remove it. I've heard that it would be in the extension tab if you could just select the tab and select "View" in the menu. Üterse Silemät I can't find the way to remove it. Üterse Dämät "Under the hood" was different words. Üterse Ka Suhtemaa It's in my sidebar and I can't remove it. Üterse Suhtemaa Is the extension menu

accessible from the extension tabs? I searched through the about:addons and couldn't find it. Üterse Dämät If you're asking me "How the heck can I get my history without having Opera show it?" I would like to answer that. If you open one of your tabs or history menu, and see the "Internet options" it should be buried somewhere in there. C'est C'est! I never noticed "about:addons" as a option. You've been a lifesaver (about: extensions I mean). I'm using nightlies

but I need to tweak the extensions in order to use it. Üterse Suhtemaa There is a big hidden piece of code in the main Opera's
