A 4th grade teacher's lesson plan uses the Hobbit and Auden to expose kids to the absurdity of war. High school teacher Franklin Balske is working with students at Lewis And Clark High School in Bend, Oregon. His class is studying literature through the lens of conflict and the use of non-fiction writing. As part of their reading, students are reading Shakespeare's Coriolanus, a text that is full of violence. Balske, who teaches 4th grade art/social studies, has his class read Auden's "September 1, 1939" to get kids thinking about the circumstances surrounding World War II. The poem is often quoted, and a quick Google search will bring you to the work of countless famous folks. Auden himself told an interviewer that "September 1, 1939" "is my best poem. It is the best I have written, except perhaps for the early poems." "I didn't want to write that," Auden said. "I wanted to sing." Read a free abridged version, and watch the full version here. Here's how Balske explains it in his lesson plan: In the short poem titled "September 1, 1939", written by W.H. Auden, two men discuss the origins of World War II. Though the world is still at peace, the two men voice their fears and distrust of the Germans. The poem is such an abstract reflection of the fears of humanity when the world is still at peace. There's no mention of Greece or Russia until the very end of the poem, and there is no mention of Japan or Germany. The two men are not racist, but they are concerned of the masses such as their children. They do not realize the dangers that surround them. They seem to think that if the Germans act like cowards, then they are cowards. The language and tone of the two men is very anxious and nervous. They seem to be very worried about the future of their world and if they will be stuck in a war for a very long time. The students get the materials ready and they read the poem. They are then asked to argue whether the poem is hopeful or pessimistic, which is one of the themes Balske is trying to address in his class. Some students got pretty

Q: notepad++ load line by line I'm trying to load in a.txt file line by line and save it out as an HTML file. Each line needs to be saved as a new html page in the order they came in. Here is an example of the data: 11:45:40 Red 11:50:41 Blue 11:54:51 So, it would save like this: Red Blue A: Can use batch files to implement the solution! If a txt file with the data as you have shown in your post then the command line should be something like for /f "tokens=*" %i in (a.txt) do echo %i>a.html Now you may want to see the content of the file that is being created. So change the echo statement to echo %i To modify this from a batch file try this: @echo off for /f "tokens=*" %%i in (a.txt) do echo %%i>a.html pause You will also want to change the extension of the html to.html. Title Author Degree MS Program Organizational Leadership Supervisor Mr. Tyler Doggett, Jr. Abstract This project aligned with the organizational learning strategic plan for the HRMS to continue her tracking of, and practice application for, the AMI course as it is being used throughout the university. The article addresses HRMS development issues within the department as well as the project topic. The article also addresses the HRMS strategic plan, which provided the direction for this project. Lastly, the article addresses the organizational challenges. The goals of the organizational learning project were to understand the use of the AMI course and explore what features of the AMI are most effective, how the AMI relates to the HRMS strategic plan, and what the organization's strategic challenges were. The organization was placed in a strategic position for the course. The AMI course was used as a start point for further investigation into HRMS integration at the university. This research was approved through the Spires Research Office.
