Should parents be told that they will lose up to 6 years of their life if they continue feeding their children when their child becomes brain damaged from non-organic causes? Published: 2nd May 2017 Late last year it was revealed that a 16-year-old boy in West Virginia with epilepsy had been fed through a tube for over three years, never being told he had epilepsy. He drank water with every meal, regardless of his need for fluid. Fortunately, his condition was finally identified, possibly due to the extreme living conditions suffered by the child. After just a few weeks of treatment, he was healed and his parents were told to stop feeding him. The conclusion: If the child was unconscious, or unaware of the

There are many types of hinges but like all types, they all have one thing in common - they all swivel. Here's a brief explanation of the types of hinges and how they work. The most used and universal type of hinge is a simple pin. Pin hinges are the most

---

important in terms of how they are used. A pin hinge is simply two pieces of sheet metal, slightly curved at the same radius and connected by a pin or pin. The pin is driven into the end of one piece of sheet metal and through the other, shearing off the end of it. This means that the pin ends up by the other piece of sheet metal, where it is stopped by the edge of the sheet metal, usually by some sort of stop bar. A pin-type hinge can be like a band or ribbed hinge, but usually has a pin that just goes into a hole in the sheet metal and ends up on the inside of the piece. It is often used for drawer slides, where the pin goes down into the slot at the top of the slide and up into a hole in the bottom of the drawer. For those with limited access, or if the pin doesn't have a hole in the piece, a pin sometimes is extended by a slightly curved piece of metal or an extension pin that goes into the hole in the piece but goes through the sheet metal of the opposite piece. It is also often used on the main doors of a piece of furniture, where the door has a hole in the side and a pin that goes through the door, through the hole in the side and into a hole in the frame or doorpost.

**Squarena is a skill based party game with an emphasis on physical action. If physical action is what you're into than Squarena is definitely the game for you. There is a certain personality to the game which is why we can't not recommend it enough. Squarena is not a simple one-man party game, and it has a lot of replayability that will keep you playing for a long time. Squarena is a full three way skill based combat game, where your character's health determines its size. It's only when you are extremely low on health, that you start to feel the impact of bullets upon your person. It will be your health and your skill that dictates your success in this highly competitive sport. Each of the weapons and abilities that you can use has a certain speed and velocity at which it can be pulled off. Like all skill based games, you will need to improve your accuracy and reflexes to win. There are a variety of characters in the game that can be selected from or unlocked from the beginning. Each character has their own strengths and weaknesses,**

---

which can be further enhanced by unlocking various characters that will provide bonuses to the ones you already have. Can you withstand the damage and stay alive long enough to unlock new characters? Each map has different rules, but most will follow the same general theme. The biggest difference between the maps is the gravity, which is one of the game's key elements. I have found that the higher the gravity, the more brutal and easier it is to pull off combos and moves. The gravity depends on the map, which makes a lot of the different maps fun to play against other maps you have unlocked. There is an overall sport based mode, as well as a series of preset arenas for you to choose from, as well as custom arenas that will be created with each new update. These arenas include everything from the kitchen to the scariest setting that they can put your character in. Play in the outer space of the Remoraja or the outer limits of the Subterra. There is a lot to do and to unlock, and it is up to the gamer to decide where they'd like to be! Squarena has a simple and intuitive color based control scheme that makes it easy to understand and follow. We know that it is not for everyone, but the different options include a macro-keypad and gamepads as well. Squarena supports Xbox 360 controller, and Steam Controller as well as Android, iOS, and SteamOS.
