Drawing Annotations: Now you can add annotations to drawings directly from the tool bar or using the new "Autodesk® AutoCAD® 2023 Workgroup for Mac®" application. Read more at the Autodesk blog. Re-Drawing with new handling for automation: Working with large, complex, and dynamic projects often means re-drawing large numbers of features. The new re-drawing features allow the user to re-draw a specific feature quickly without having to recreate the entire drawing. When you're done, your changes are automatically propagated to all related parts of the drawing. This new capability is accessible through the Workspaces context menu. Partial Update, Merge, and Make Invisible: With these new commands, you can effectively work with partial updates, merge a couple of drawings, and make an object completely invisible. The Merge command is the single most powerful tool to manage a number of drawing files, easily merge files together, and link the merged drawing to the original. The Make Invisible command can be a great way to quickly delete objects that you don't need anymore. Freehand Stylus: Create and modify freehand sketches on-screen with the new Freehand Stylus tool.
