Two-dimensional (2D) drawings are often used in drafting. Because 2D drawings can be viewed from many different angles, the perspective and shadows in these drawings are automatically generated and rendered by the application. The default shading color and appearance for 2D drawings can be modified. It's also possible to set the default camera view to include or exclude certain layers or blocks, according to certain preset rules. For 2D drawings, the 3D tools available in AutoCAD can be used. A drawing created in 2D can be saved in 3D, which allows complex shapes to be created with less effort. The following steps must be performed to save a drawing in 3D: Press the Ctrl+T keyboard shortcut Type edit 2D, and press Enter The AutoCAD application 2D dialog box opens Type set view to 3D, and press Enter The AutoCAD application 3D dialog box opens Note: AutoCAD 2018 does not support AutoCAD Drawing Interchange Format (DWF).
