You've probably never encountered this kind of game before, a game that's so bizarre and different that you just can't believe it exists! You'll have to decide for yourself what's real and what's fake, as you play through a nightmarish and surreal world. You can either play the standard survival mode, or you can play a quirky and hilarious "Just in Time Mode". And don't worry, even if you only play the limited survival mode, you'll still have a chance to win the amazing prize of a copy of the newly released horror game "Realm of the Mad God". You can sign up to our newsletter [HERE](#), and once the free edition of the game is released (End of June), you'll be notified if you qualify for the contest! · Realistic gameplay elements · 5D movements · 100+ enemy types · Consoles supported: PlayStation 4, Xbox One, PC In short: A hand-crafted, retro-style experience, where you can encounter horror and puzzle in one epic game. You play as 'Q', a guy with terrible nightmares and headaches. When they become too unbearable, he goes to his father, a well-known psychiatrist, who sends him on a quest to find five black rocks, as they are the source of your nightmares. You can use your abilities to solve puzzles, make escapes, and find clues to help you complete your quest! Our Features - A huge world, filled with horror and puzzles. - 100+ enemy types - Realistic physics for both player characters and objects - Impressive visuals, including some 2D level elements. - Stunning backgrounds and special effects. The Coming Night You can now pre-order the game! The game will be released on PlayStation 4 (launch in July), Xbox One and PC (launch in September). Will the game be released on iOS, too? We'll let you know! Thank you for your support! You should have received a digital key for the game. You will be able to activate the code on our website, or on the Steam client, depending on which platform you own the game on. If you still can't find the code, please contact us at support@podgirl.co.uk. We'll be happy to help! -- If you don't have a steam account, you can create a new one here: <http://c9d1549cdd>

Onikira is a beat 'em up game. What does that mean? How does a beat 'em up work? To begin with, in a beat 'em up you will use some type of weapon in order to kill monsters and bosses. The game we are talking about is Onikira: Demon Killer. This game is actually Early Access and therefore it is in development. This is not just any game. Onikira: Demon Killer is a 2D beat 'em up game that allows you to acquire different upgrades and combine them to become stronger. You have something like a Sub and an AOE type of weapon. Each weapon have its strengths and weakness. In a perfect world, you would upgrade it as you play and combine the effects of the weapons to create a certain power. This game is in development and it will be released for Microsoft Windows, Playstation 4 and Xbox One. Onikira: Demon Killer is still under development. We do not know what improvements will be added and what are currently being developed. Over time, we will make videos like these as we finish developing the game. Development Schedule: Our target release for this game is in a year from now and currently we are in the first phase of development. We are currently working on combat. We have done a fair amount of testing and are currently polishing up our combat system. Every boss in the game has their unique combat patterns. There is a "boss rush" system where the boss goes after you. If you run from this system, it can cause the game to be complicated. This is one thing I can say so far. We are also in the process of polishing the combat scene with new types of enemies and battles. We are making some strong progress. We are currently making the map editor with topographical data in the levels. It is quite difficult to make the game maps with automatic background placement. We are working on a way to create the game maps with the current background. We are doing some research into collision prevention. We are currently discussing how to build the levels. You can make your own, or we can make it for you. What we are currently working on There are some things we are currently working on. Refining the combat system We are working on combat. We already have a good combat system in place. Refining the boss rush system We already have this system in place
