□Expansion of fantasy role-playing with memorable classic game-play□ □Not only a good RPG but also a game that merges fantasy and sci-fi together□ □The legacy will remain and flourish in the future□ Mobile game developer, CAPYON Inc., announced today the “EXPANSION of fantasy role-playing” for the smartphone game, TARNISHED. The announcement was made on the company’s official website. As the series of TARNISHED up until now, the production staff is aiming for a new meaning of fantasy fantasy role-playing, which includes something to be intended for the mobile user as well as the series. The game will start players in a fantasy world of which the rules of game play are completely different from the present TARNISHED. The world in the new game differs from the setting of TARNISHED, which has a place where very peculiar beings are living. Due to the original game-play of the series, it won a number of high popularity in the RPG niche as well as recognition from both the game development industry and game players. From now on, the fantasy fantasy role-playing game by CAPYON Inc. will be expanded and improved into something more than just a beautiful game that you can enjoy casually at your leisure. ▼ The Setting TARNISHED is a game in which players are immersed in a fantasy world of which the rules of game play are completely different from the present TARNISHED. In the world of TARNISHED, there exists a place where peculiar beings are living. The six classes of these beings are refined so as to be able to manage what they desire. It would be a game in which you can freely change the game rules to suit your own desire. ▼ The Character Creation In TARNISHED, you can create a playable character with a variety of customization features. You can freely change your character’s appearance, class, and stats by a multitude of options. You can change the class when you create your character, and the statistics of each class are able to determine your future story. When fighting against foes in the game, items acquired by defeating them are used to change your character’s stats. As your wealth and level rise, you bff6bb2d33

1) Create your own character ... World of Shard – Behold! On the planet, the human race lives harmoniously and there are still no major barriers among the various races, however, a secret organization, called the Order of the Shard, is working to gather resources and construct a machine that will consume the world; however, a new discovery has been found, and all of the races are gathered in the Magic Arts Research Center. There, the Order of the Shard has secretly recovered a giant robot called Zephyr that spreads fatal germs and they have gathered Zephyr together. The large scale robot is taking an active role in the government, attacking the citizens. To be able to stop Zephyr’s attack, preparations are underway for a counterattack with a new technology that utilizes a weapon called the Orin. Player Characters ♦Dynasty story There will be a clear story of the world and the people. ♦Endless game play with changes The game will continue even after players have completed the base game. ♦Imaginative and immersive battle system Players can experience a battle system that takes the feel of the various machines to the maximum! ♦Characters with a variety of battle styles Players can freely increase and decrease weapons and equipment ♦High-quality 3D graphics The game is full of astonishing graphics and immerses players in a different world. ♦High-quality animation and combat scenes Players will be able to enjoy the 3D Graphics more than ever with amazing combat scenes. ...Q: localStorage value is not updated in firefox I have read through most of the questions asked here about this. I simply can't seem to understand what I'm doing wrong in my case. I try to store a simple value in localStorage but it is not working. Here is the code I use to save the data and read it back: localStorage.setItem("myVal", "MyValue"); var myVal = localStorage.getItem("myVal"); console.log(myVal); and the code I use to read it back: localStorage.setItem("myVal", "MyValue"); var myVal = localStorage.getItem("myVal"); console.log(myVal); The result I get is that I can see the value in the console in chrome, but not in firefox or
