English 1.1 02/19/2017 ?About the Developer Luminescence Inc. is a developer located in the Tokyo, Japan who specializes in the development of "Open world Action RPG" with old school feel. ?Key Features ?RPG Elements The game system, which is completely different from previous titles, revolves around the main and sub-quests. What is not asked in a quest, you can freely roam on the map. On the other hand, what is requested as main or sub-quest, you will be able to complete it by actively fighting enemies. This game is also a combat-oriented game. Each time you fight an enemy, your character will gain something. While managing the items and skills that are acquired through the combat, you can use them to boost the combat power of your character. The game system is entirely different from previous games, as it focuses on an "Action RPG". However, since the game is combat-oriented, we improved the game features such as upgrading weapons and skills and upgrading armor to increase your defense. In addition, we added an enemy behavior system, which gives you a great advantage in battle. For instance, a monster will attack you while looking at you, and if you attack it, the monster will be able to change the location of attack so that you will easily lose your battle. We also added an element of surprise, that is, a monster will never fight before it detects you, and it is possible to keep trying until you defeat the monster. ?Open World Action RPG The open world has been greatly enhanced by adding an "expanded traveling map". Players can also choose an path that is not in the main story, so that they can explore a variety of different routes. ?Online Play The game supports multiplayer. In addition, it supports a unique online element where it is possible to see the presence of others who are playing through the asynchronous aspect.
