"HyperMotion is the most accurate, most realistic and most immersive animation system FIFA has ever delivered," said Oliver Haden, Senior Designer at EA SPORTS FIFA. "We are extremely happy with the results of our year-long development. We are incredibly excited for our players to experience the FIFA 22 gameplay tomorrow." And to help take one of the most immersive football experiences to a whole new level, FIFA 22 introduces "FIFA One Pass," a brand-new feature that allows you to "look, move and play" through every match action you experience during the FIFA 22 Experience. Look Look is an all-new peripheral that can be purchased separately for \$59.99, or as a pre-order bonus for FIFA Ultimate Team. The Look has an iOS and Android companion app that can scan RFID cards and award FUT Packs depending on your performance. It also features an exclusive "Vision Search" power-up. The Vision Search, included with the Vision of the Game controller, allows players to control a technology that scans all the player models in the current match and provides the player with information on the strength of their nearest rival, it's current performance, past history, and many other items. Move The Move is a motion capture (mocap) controlled football system that allows players to take full-on, high-intensity, 100-percent game-like actions. It has been designed to provide footballers with the control they need to play while in motion. The Move is the first football-specific mocap controller to market, and is connected to every game from FIFA 20 to FIFA 22 by the Move Central app. Play FIFA 22 has remastered passes for every current-gen FIFA game - including the classic 360 and Touch passes - and has introduced 30 new players that take the game's player models to a whole new level. The FIFA 22 experience is available at select retailers worldwide, with pre-order access available exclusively on PlayStation 4. If you don't have an available game time this year, there are still a number of options available. Download the FIFA experience on PlayStation 4, or start the FIFA Ultimate Team Journey to unlock rewards for an entire year and earn the FUT Pack in order to add a whole new team of players to your squad. PlayStation 4 and Xbox One players will be able

Throw In Action: Throw in action is a manual type of pass. There is a 45 degree spin on the ball, and the ball has a good chance to hit the first defender. 2. One Touch Action: One touch action pass is extremely fast and very easy to control. It is a very useful pass for long range crosses. The player holding the ball runs up to it, taps it once

What's new in Fifa 22:

- **Career Mode - Live out your dreams as both a manager and a player in FIFA 22. Create the newest club in FIFA, design your kits, style your stadium, and choose whether to compete with the elite or rise up from the lower divisions as you manage your club to glory. Or test your skills as a player, with a more immersive Player Career mode that gives you more ways to progress, achieve, and immerse yourself in your Pro's journey through the game.**
- **New moves and shooting abilities - Every weapon in your arsenal has fresh new moves and shooting abilities. Attack workspaces are better defined with new defensive responsibilities and more intricate jump crosses. Players who like to be the "guy with the ball" can now tackle with the intensity and high-octane nature of a Premier League fixture.**
- **New free kicks - Tons of free kicks are being delivered in FIFA 22. From long range shots, through front posts, to ridiculous powerful volleys into the stands, or on target set pieces, free kicks are often a defining moment and can often decide a match. While it may not always be the best way to score and find the net, free kicks can totally change the course of a game.**
- **New off the ball AI - Players have finer attention to detail, reacting to the ball quicker and turning to face those around them when they realize an opportunity. All off-ball animations are improved and now catch-up animations for offensive moves will no longer occur if the defender goes the wrong way.**
- **Off-ball players can be dispossessed in the air, to create uncertainty and provide the ball with a new dimension. Defensively, players will now lay off long balls where there is a threat.**
- **FIFA Ultimate Team**
- **More ways to unlock new playable characters - Play the Role of Manager Mode to try and unlock top stars worldwide, unlock events to introduce brand new playable characters, or play in competitive online matches to earn a whole new roster of legends.**
- **Geographical improvements - New kits, transfers, and changes to the way fans rate players in the game. Clubs are now ranked from Country to Club, and now will look different depending on where you place them in the country rankings, with more relevant kit and stadium graphics.**
- **Focus improvements - Camera and Player Positioning Improvements will provide a livelier viewing experience, improved run-**
