Eight elite footballers took part in the game tests: Manchester United's Paul Pogba, Chelsea's Eden Hazard, Manchester City's Kevin De Bruyne, Liverpool's Sadio Mane, Real Madrid's Cristiano Ronaldo, Barcelona's Lionel Messi, Juventus' Paulo Dybala and French striker Kylian Mbappe. FIFA 22 offers authentic player behavior and reactions through an advanced physics engine, as well as believable ball physics and improved ball/player collisions that result in additional on-ball actions to the game. Explosive individual moves, such as Ronaldo's overhead kick against Ajax, or Messi's exquisite free-kick winner against Leicester, or Hazard's run from half-way into the area and a perfectly-weighted through ball to open up the scoring, can be performed when trying to score and defend simultaneously. Reaction and movement-based player control models allow players to manipulate the ball with intelligence in order to play their favorite ball-control passes. The new "Every Pass" control system allows players to move the ball in the right direction and in the right style, while still being in control. As the player progresses through the 18 Passes, their style of movement should be adapted to the type of play. The "Every Pass" control system will be available on Xbox One, PlayStation 4, and PC. FIFA 22 introduces "New Generation Player Intelligence", a new set of player stats that enables more intelligent player behavior, making each player more unpredictable and unpredictable. We also significantly improved the flow and physics of the player animations. The new animations, with both pre-determined and reactive player behavior, give players the feeling of reacting to environmental conditions. These changes will ensure that every player appears to behave in an intelligent way. The new intelligence system allows players to make decisions and decisions to make to manipulate the ball. The game will use the feedback from the player in order to make sure that the on-pitch behavior of the player is as close to reality as possible. Goalkeepers will now be able to out-jump their defenders. This enables goalkeepers to react better to tackles and maintain possession. Defense: We redesigned the interactive AI defender model and we now have more diversity in their game. Every defender makes his own decision when to jump and when to cut it short. Players will be more unpredictable, making decision to counter attack or

pass or press higher up the pitch.

Desmoplastic small round cell tumor of the tongue: review of the literature and case report. Desmoplastic small round cell tumor (DSRCT) is a very rare aggressive malignant neoplasm, most commonly affecting young males, adolescents or young adults. It is classified as a distinct entity among other aggressive mesenchymal tumors. The tongue is a very unusual site of this tumor. Literature search revealed only 18 cases with tongue involvement, which were not treated with surgery. We report a case of DSRCT in a 17-year-old male with buccal, tongue and submandibular lymph nodes involvement. The patient was treated with chemotherapy and radiotherapy. He is still alive and free of disease

after 52 months of follow-up. This case report is similar to those previously published in terms of site and radiotherapy, but differs in terms of overall survival and histology. As in FIFA 21, Ultimate Team features two modes: FUT Draft & FUT Season. Now players can create, manage and play in custom tournaments – Draft & Season mode tournaments can be created from any playable tournament type. The introduction of Draft and Season mode tournaments also allow for larger custom tournaments with more money than ever before. Plus, all of your clubs from FIFA 21 are available to play in Draft and Season mode, so you don't have to start over from scratch. As you progress through the tournament you'll have the option to win prizes and make more money to upgrade your squad. The new create your own player feature enables you to design and import your own player in FUT Draft mode, who you can then play in your custom FUT Season mode tournament. In-Game Game Modes Casual Controls – Created by FIFA veteran Eric Chahi, casual control modes for beginners and casual FIFA players allow you to control the ball, shoot or pass the ball as you would in real life, allowing you to simulate a more realistic and intuitive control scheme. For example, you can choose from three different control schemes – passing, shooting and dribbling. Custom Teams – Create your own teams of up to 22 players, then enjoy the new feature of customising your stadium so that you can have the home pitch where you want it, not where FIFA tells you it has to be. Your own club stadium is a new feature in FIFA 22, providing fans with a more immersive and authentic experience. Spectate Pass – Spectate from the official FIFA commentator this year, Matt Pilkington, as he comments on all the action for you in real time. Share your highlights in FIFA Ultimate Team Player Appearances – Share your best moments on the pitch from the official FIFA commentators this year, Matt Pilkington and Demy de Zeeuw as they offer their interpretations of all the matches that you play in your favorite tournaments. Improvements to FIFA Ultimate Team QA Improvements – FIFA Ultimate Team brings a new iteration of our gameplay development tools with a new QA testing setup that involves thousands of units running in parallel to simulate the millions of circumstances that can happen in a game. This allows us to identify issues before they go into production, significantly reducing the time to fix issues that arise. FUT Draft – Created by EA, FUT Draft allows the player to take a themed draft of all 22 players for a personalised FUT Draft game. FIFA Ultimate Team also
