FIFA 22 introduces the new RPG-style Manager Mode, and dynamic Player AI- it is the most realistic way to play the game. The new Trajectory Control option enables artificial intelligence (AI) to measure the flow of the match and react accordingly - for instance, weak-side defenders will cluster around the ball to prevent attacks, while a strong-side midfielder will drift in to create space and control the flow of play. Coaches can order running play in the opposition half, calling the opposition onside or getting the ball and directing play as they see fit.
