Might is Right's world is entirely procedurally generated. No two playthroughs will be the same. It offers a handful of settings, but with a high level of freedom and variety. Game themes In the game, you will play five characters. Each of them has their own set of talents. Here are some examples of their abilities: 1) Warmonger - a tank with dual-wielding weapons and health regeneration 2) Mage - elemental magician that drains energy from enemies and then starts fires 3) Priest - powerful healer that can also erect a protective aura and heal friendly units 4) Rogue - movement specialist with stealth abilities and defensive buffs 5) Bandit - stealth specialist with melee attacks and supportive abilities. Each hero also has a personal story. This story takes place between the events of different chapters, and each chapter is accompanied by 10 unique songs written by professional composers and artists. If you don't like one of the five hero stories, you have the option to change it in any way you wish. Each of your adventures, regardless of the heroes you choose, starts with a unique prologue. Campaign mode In the game, you can freely explore the procedurally generated map and make a decision from a multitude of possible paths to the end of the game. If you like you can switch to the campaign mode, which is focused on a single hero and comprises 20 chapters. Even in this mode, every chapter is unique and focuses on one of the five chosen heroes. Chapter chapters will take place during the game and be accompanied by 10 unique songs. Combat mode The combat mode is the main game mode. You start with a randomly created team of 6 units. After carefully selecting your character and applying him to your team, you will have to deal with a multitude of enemies along the world. Which team will prevail? Only you will know the answer... Might is Right is a Flash RPG with turn-based combat. Throughout the game, you will fight hordes of enemies and complete quests. Make your own choices and try out combinations of units and heroes to find your own play style. published:20 Jul 2017 views:238046 To help the adventurers on their journey, I will be starting this new weekly Let's Play for SirMullet. With the 1.4 version, the game was reborn - I made 3 new characters in a new world, and started a new game from the beginning. I played as a warrior, ranger and wizard, all of them behaved different. I created a map of the world, and gave the rangers the ability to ride horses and to go on a free-roam mode, and the game is going to be bigger and more free-roamed than before. Come and join me on my journey through the game to rescue the princess! Facebook: Website: Also follow me on Twitter: Patreon: SirMullet 2 is a 2D Action RPG with RPG elements. The main character is a hero trying to save a beautiful princess from a dragon's Castle. Now he must explore the lands to find the items to kill the dragon. There is a variety of weapons, armor and other useful items. Follow the story mode from the early stages to the end to see it all. There is also a co-op mode for 2-4 players. Abrix, a robot with self-learning machine learning capabilities and a human interface, is a unique and innovative combination of robotic and human abilities. This is your robot butler. Become an intergalactic hero. Lead Abrix to victory in the post-apocalyptic future. Build your team and upgrade Abrix to overcome a band of ruthless warlords and robots. There is a unique twist to this action shooter, which will challenge your reaction time as you fight for your life and help Abrix protect the city. Abrix was developed by Playdigious, the creators of SpellTower and the Propellerhead Reason music production software. The soundtrack is created and composed by the musician and illustrator Ree-D. Approved by Ree-D & Playdigious Email: Facebook: www.facebook.com/Ree-D/ Twitter: twitter.com/Ree-D Keywords: robot, technology, kids, fight, shooter, action, stealth, Puzzle, shootemup, battle Game engine: Unity3D After the big success of the first one, we decided to make another "Abrix the robot: the best party ever". This time around, we tried to add a little 'More/less' with some new stuff (animations, new items, new weapons, new wall and new controller). As always, we worked close with Abrix, to make him become more human: you can turn on the shadow-cast, keep him in the air with the aim to keep him in the air, make his load-out bigger and smaller, re-balance the functionality, change the sound and music, and much much more. This time, we added a nice mechanic, where you can let Abrix fall and do not die, where he will slowly stop falling and bounce back to the air, and if he touch the ground, he will be grounded for 10 seconds (where you can walk or use Abrix). This time we had lots of fun! We hope you like it as much as we enjoyed making it. You can try it out for free, with the option to buy some DLC's. All rights reserved: EJR Sp. z o.o.
