I have to upload image to web server. What is the better way to upload? Using OAuth as these solutions: Google OAuth 2.0 or Salesforce OAuth 2.0 A: The way to go is to use email and FTP for uploading files A: You should use Server Side File Upload. Since you want to download the image to client side, you should use AJAX to upload the image in the background and request the URL from the server so that it could be used to download the image. On the server side, you could use standard file upload module such as PHP GD or Python PIL or Perl DBI. Here is a tutorial on PHP File Uploading: Amb

Show HN: Experienced founder offering mentorship - accaac HN,I am Michael and I am currently looking for someone to mentor me over the next several months. I have been working on multiple products for the last few years, but I am now ready to step back from a bunch of them and let my idea have its way. This has happened before, but I want to finally give it a go and roll out all my projects at once.As a mentor, I would want to provide some accountability, mentoring, and guidance if needed, and perhaps do some traveling if there's good opportunity for that too.I have lived in every state in the US, and plan to be around for at least the next 6 months or so. I would want to travel within the US, and not to much to start with, but eventually aim for Europe and Asia.I am open to looking for a mentor outside the
