Category:Video recording software Category:Windows-only video editing software Category:Windows multimedia software Category:Discontinued Windows software Category:Video editing software that uses GTK Category:Software that uses Qt 3 Supplemental Rule G(8)(a), every prison official "who knows that a particular inmate is injured, is responsible for ensuring that the inmate receives adequate medical care," and that "[d]eliberate indifference to serious medical needs of prisoners constitutes the unnecessary and wanton infliction of pain prohibited by the Eighth Amendment." Estelle v. Gamble, 429 U.S. 97, 104 (1976) (internal quotation marks omitted). We have reviewed the record and the parties' briefs on appeal and find that there was no error in the district court's ruling. Accordingly, we affirm for substantially the reasons stated by the district court. Arsenault v. Davis, No. 1:11-cv-02804 (S.D. W. Va. Apr. 24, 2012). We dispense with oral argument because the facts and legal contentions are adequately presented in the materials before this court and argument would not aid the decisional process.

Natural product (NP) synthesis is an important area of research in chemistry and medicine. However, it is still difficult to produce a structurally complex NP by conventional chemical synthesis. Although chemoenzymatic synthesis is a particularly powerful tool for chemical synthesis, the achievements are limited to the combination of chemical and enzymatic reactions. In contrast, enzyme-catalyzed synthesis of NPs can be categorized into two types: (1) cascade reactions in which multiple enzymes are involved in one pathway, and (2) directed reactions in which multiple enzymes are used in spatially or temporally distinct manners. Cascade reactions have been extensively studied, and many types of cascade reactions have been established with an array of enzyme catalysts. In this Account, we describe recent progress in employing cascade reactions of multiple enzymes for NP synthesis.The Lions have signed outside linebacker Jerrell Harris, a former New York Giants seventh-round draft pick, the team announced Friday. Harris, 25, has appeared in 35 career regular-season games for the Giants with seven starts. He has had a cup of coffee in seven NFL seasons, spending time with the Arizona Cardinals, New York Giants and Cincinnati Bengals. Harris has been a key part of a strong Giants defensive corps since signing with New York in 2016. The Lions could be in the market for pass-rushing help after signing Ziggy Ansah to a blockbuster deal earlier this week. Linebackers Danny 1cdb36666d

Privacy Policy OKQ: In SQL, how to specify a numeric field as a character field while ordering a query? I have the following columns in SQL: id int(11) cust_id int(11) name varchar(35) city varchar(35) state varchar(35) zip varchar(35) cust_type varchar(35) value decimal(5,2) date date description text The value column is a decimal(5,2) which records values in the range of 0.00 to 1.00. There are over 500,000 rows in the table. I'm trying to find a query that will find the top 10 customers (by order) based on their value column. But I need to include the sort order of the rows in the output. I could just do this SELECT cust_id, name, city, state, zip, cust_type, value, date, description FROM table ORDER BY value DESC; But I need to be able to specify the numeric column as a character field so I can include the numeric column in the sort. Like this: ORDER BY 9.5 DESC; # top 10 ORDER BY 9.6 DESC; ORDER BY 9.7 DESC; ORDER BY 9.8 DESC; ORDER BY 9.9 DESC; ORDER BY 9.10 DESC; How can
