What's new in Pixel Worlds: MMO Sandbox:

is open beta now. Check out our review [here](#). About Alice World Alice is an isometric sandbox MMO created by Bejeweled-makers Zynga. It currently features 5 regions with endless exploration, gathering, safe mining, crafting and player vs player combat. Combat has some simple effects with the ability to transform zombies and animals into useful mobs to destroy. Lucky a few hundred thousand people got early access and made Alice a hit even though the Beta is currently offline. After the state of the art title Shadow of the Colossus PS2 is released, id Software makes a sequel to Doom the Real Thing. They never delivered the sequel of Doom 2 and finally broke with their publisher to make new games (but Dead Space was announced only a few days ago, what?) their next game was Crazy Dave Co-op which is a side - scrolling shooter and you - the player - has tons of weapons and multiple free levels to explore. Here is a feat of stupidity - Crazy Dave got an appearance in indie MMO Project Two, an “apocalyptic sandbox MMO”. So they added it to the press release - but Team Fortress 2 and Wasteland 2 got the first appearance. Project 2 has been released to a good number of people, but has suffered from the gamedev rush of the release. So it is not the right project to judge these kind of answers right? “Our Project Two team has been working hard to get this game on track to a solid release date. Thanks to the great assistance of the Source Filmmaker team, we’ve been able to add new features that are going to make Project Two’s gameplay much more accessible to a wider audience”. I am going to guess that InstantAction will first of all just improve generic stuff like rising health points for higher damage. But I am really curious, how player versus environment stuff will work in Project 2? Can there be combat on high slopes? Can defenders charge behind players? Is there vehicle aiming yet? After half a year of waiting Age of Empires 4 finally arrives - and it is an “unfinished game, but just as relevant and interesting as Age of Empires 3”. Did they really spent half a year only to implement a single new thing? Hardly, and the Age of Empires engine costs a lot of money like hundreds of thousands of users expected (sounds like Age of Empires 3 has finally crashed hard, already). It is a shame
