Synaptonemal complex analysis of potential cases of sex reversal in rainbow trout (*Oncorhynchus mykiss*). Prostatic cells were collected from 40 rainbow trout (*Oncorhynchus mykiss*) at 4-5 weeks of age, representing both M lineages. The cells were treated with colcemide to produce a chromosome-alignment preparation. The alignment indicated that, in comparison to the M- and PM-lineages, 21 M-lineage cells and 2 PM-lineage cells had one or both X chromosomes missing or were abnormal. Subsequent analysis of these cells indicated that the cells with one X chromosome missing (both M lineage) were diploid, with one X chromosome from the maternal M lineage and one from the paternal PM lineage. The cells with an abnormal X chromosome (1 M lineage) were diploid, with one X chromosome from the maternal M lineage and one from the paternal PM lineage. The monosomy is, at least in part, genetic, with the remainder resulting from death of the second X chromosome and fusion of the two X chromosomes to each other. The abnormal X chromosome in the latter cell type might be a putative chromosome marker for a single locus recessive mutation that arose in the evolution of a sex-reversal trait.

## **What's new:**

**February 4, 2013 / ShelfLife® Blogs Buy Local First: Gucci Perfume Edition By Lou Lumenick** U.S. consumers have become increasingly weary of high street brands' aggressive marketing campaigns. That's no surprise. Historically, it was the most direct way to reach customers, and profitable for retailers. The era of discounting, flash promotions, and widespread personal advertising via the Internet, combined with the rise of discount grocer Publix and Walmart, has changed the retail landscape in our country. But the local and ethnic brands are fighting back: saving money for the customer, promoting what they do best, and keeping customer data to themselves. But this shift away from big brands has its cost. "[B]y its very nature, retail is a store-based profession," says Janice Cheng, manager for e-commerce at Charlotte Russe. "We're going down the path of companies that don't want you to shop with them." Cheng knows companies are losing \$10 billion each year because of so-called shopper fatigue and is working to reverse that trend for the retailer, which has mostly been known as a trendy outlet store. All of her efforts in the past year have been based on putting itself in its customer's most convenient store by offering a discount at stores or, where appropriate, online. Charlotte Russe works closely with local vendors that offer tasteful merchandise in meaningful increments. Local sourcing is helping the company stave off the big-box competition and push customers back to more local, trusted retailers. Ethnic and local brands also enjoy a loyal customer base. "Black consumers in particular understand the relationships," Cheng says. Her store also broadcasts tours on Facebook.

**Having a face-to-face relationship with these people “is really important. There’s a trusting factor there. They’re more likely to commit.” RadioShack Expands with YouTube By Lou Lumenick One of the most prolific Web video destinations in the U.S. is RadioShack. With more than 10,000 online videos spanning everything from news updates to interviews with celebrities, the retailer’s social media resources appear to be on fire. But Radioshack has stepped up the game. On Jan. 11, the retailer announced that it will now stream its new products**

The story is inspired by the real life of people like you, but it includes fiction and subtext. "SECTOR 40" tells about several aspects of the organized crime. It is a story of your kidnapping in the tenth year of the century, of getting to know the friend you can't remember and of your interrogation in "SECTOR 40". The game is dedicated to the memory of those who fell into the hands of the Soviet system. The game "SECTOR 40" is based on the concept of emotion, fear and anger. The player will be exposed to a wide range of emotions while experiencing a variety of different situations and developing relationships with other characters. Gameplay Features: - 3 levels of difficulty - Single Player or Multiplayer, available for PC, Mac and Linux - many classic game mechanics - a variety of different narrative scenarios - comprehensive system of character development - affective and reflective story design Important notice! The game is available for download only if you have the Microsoft Windows operating system (XP/Vista/7/8) and the most current version of the Internet Explorer browser (10/11/12). For example, the main character "Josie" can wear various clothing items from different eras of the 20th century. It is possible to change the style of her wardrobe and appearance using the in-game special item "Sectoral clothes" and to choose between formal and casual attire. Play "SECTOR 40" now and save your friends from a life of confinement!The Returners "And I can add one more thing: SRC's tank design is garbage. The thing is a giant deathtrap." "The Returners is truly a thing of wonder. A thing that only deserves death by sword." "I was impressed with the tank. It was a very impressive solution to the problem the game presents." I guess what I'm trying to get at is this: There are some things about games that I don't like, and one of those things is the overwhelming focus on what the viewer wants. That's not to say that there's never a right way to do things, but often it feels like the developers are under the gun to do something
