It also features a complete dictionary with definitions and examples. The app is wrapped in a well-organized and intuitive layout structured into four distinct sections, namely, determine and increase the speed, expert mode and admin functions. In order to access the tool, an account needs to be made by inputting a new username and password. Choose the desired lectures and have fun while studying It's recommended, but not mandatory, to start with the reading speed, which displays a random text and once you're done, the tool shows the number of words per minute that you managed to read. This is taken into consideration for the future drills. In the test results, you can view a simple graph with your activity progress. The exercise section comes with a total of 34 sessions you can do, and each game is unique. Apply content customization to best suit your tastes The drills contain different lessons designed to improve the reading and focusing skills, along with a few eye exercises. In order to access the next category, the previous one needs to be completed. In addition, you can use a custom file and configure specific settings for an optimal experience. A few examples are the font size, type and color, shown words, flashes per line, pause between special characters and the box width and height. What's more, the app lets you look up for an unknown term using the built-in dictionary and insert your own texts to view. Speed Your Read aims to help users increase the speed and attention to detail when reading, and offers a variety of games and drills for the eyes. Features: - Four categories of drills - Graph of your progress with short hand-drawn dots - Customize settings for users' needs - Random texts for readers to review and predict - Eye-focusing and attention to detail drills - Complete English Dictionary for users to consult - Brain training exercises and games Texting Explained After someone receives a text, this may be a one-time occurrence or a sequence of messages. Here, we explain texting in detail. Texting Explained The advent of text messaging came as a big surprise to even us technophiles. In a way, it seems like a natural extension of email. Imagine receiving a message and having the option to open it with a hot key, reply with a quick text message to a group or type a reply to somebody via a third-party texting service. Today, texting is the most popular way to communicate over the cellular networks. However, as you'd expect, this method of communication is not without its drawbacks. There are limitations on how many characters can be sent and received in a single message. Let's take a look at some of these rules: - Single Messages: The maximum number of characters a user can send in a single text message is 160. - Group Messaging: Group texting lets people send a single message to multiple recipients at the same time. To do this, you must first send the message to the central group address (in the same way you would send an email). Upon receiving the message, each of your contacts will get a copy. - Re-use of Messages: When a message is sent to a group, multiple copies of that message are not created. A user can, in fact, receive messages that were sent to a central group address as well as those sent to individual contacts. - Multi-Sender Messages: Though it will not be shown in the list of received messages, each message sent from a multi-sender account will be stored in the threads of each individual contact who received the message. - Receiving Messages From Unknown Numbers: A cell phone's user interface will show the number of a message sender, as well as the number of the account used to send the message. The user interface may not show the message's text. If this
