The 2 vols of the music score can be unlocked by spending over $12. Unfortunately, the team behind this game is no longer in existance, so there's nothing we can do about this.Q: Extension process "received an invalid reply" I'm attempting to call an InvokeMemberMethod() on a COM object, via an extension assembly. The COM object has a property-changed event that is triggered when its value is changed. However, I'm getting the following error message when attempting to build the assembly (the message is coming from the .NET compiler): The assembly 'MyAssembly, Version=1.0.0.0, Culture=neutral, PublicKeyToken=null' uses an invalid version of the .NET Framework Specification. The required version is 3.5.30729.0. Note that I'm using Visual Studio 2010.

 of a diabetic neuropathic pain patient (PVA) walking next to Zillions Two (and a small calf) and Parvo walking over the rocks. Thursday, August 24, 2010 Monday, August 21, 2010 People often ask me why I'm always so tired. Why is it that on any given day I don't have the desire, energy or strength to get up, get dressed, get on my feet or even do the simplest of daily tasks such as brushing my teeth. The fact is I've come to the conclusion that chronic fatigue syndrome (CFS) is an energy impairing disease like diabetes and many other illnesses that kill people. It's nowhere near as well-accepted as depression or brain tumour but it has no better champions than any other. In fact, it's worse. Except for a group of patients called Munchausens who have an actual disease to beg discharge from hospital they go home to be killed. The rest of us are the victims of honest, caring and utter stupid doctors who can't afford to lose their jobs and usually do what they are told no matter how ridiculous or damaging to the patient. Yet still doctors use a variety of drugs to treat this illness and do the absolute minimum in terms of treatment which of course is what the condition could not cope with. Then again...the doctors are desperate. Some have come to the realisation that the years of trying to deny you have a neurological disease and then 'deciding' that you're all wrong proves that they aren't capable of dealing with such a condition in an honest way. But I digress. So my cure for fatigue is simple. I sit and watch my body do what it loves: Rest. Once I learn to embrace it, "Crash" my energy is back, and as soon as I'm rested I feel fantastic again. It's sad how things that are true for diabetics are often applied to CFS, and once again, those who suffer from this other relentless debilitating disease are the least understood. We often are the most quiet, down-right incompetent victims. These diseases destroy lives, but there are two subjects I would like to take up: First, the CFS Diagnostic Centre in Sydney, Australia because this alone has emerged as the only site that actually cares about CFS it's true so yes, tragically it does destroy lives. I do believe that there is hope. This annual conference is the only show in town for the last four years. I believe it to
