"The game is loosely inspired by the legends surrounding the missing child known as the Bride of Baskerville. The legend goes that the town of Baskerville is cursed, and after it's residents were murdered, a local young couple took up their torches and joined forces with the evil spirits of the town. Together they took up residence in the demonic Baskerville Hall, where the bride remains even to this day, sleeping alone in a glass coffin. Now the town has become a tourist magnet, selling ghost hunting tours, and her presence has been widely noted." What can be said about this really good second wave of 2D platformer? It's just so brilliant. If you're not a fan of 90% of the current HD platformers out there (or if you've actually played a classic 2D platformer lately), please don't play this game. It's not for you. It's a reminder of what good gameplay looks like. For all you folks out there who have played classics like Super Mario World or Banjo-Kazooie, this is a must-play. It's so good. "But can it stand the test of time?" you ask. Like so many things in life, the answer to that question is yes. In fact, the game is as fresh and well-made now as it was when it came out (and likely even better). In fact, Mirror-made games have rarely done anything but "improve" as time goes on. The reason why this is such a perfect, rare example of a time-travel platformer from the old school is that it has the depth of platformer experience — but without the foolishness of some of the platformer's most annoying aspects. Instead of complete, idiot-proof tutorials, the game employs a very clever and fun "hidden" system to teach you how to play. You don't get stuck, but you're also not suddenly given the answer to everything. Instead, the game takes you on an adventure full of puzzles that keep you on your toes. The puzzles are actually clever and strategic, rather than mindless. This is a polished gem, and I don't know if I can say that of any Mirror-made title before this. And the game's world design is even more impressive. The game is set in a rural area
