It's 1960. The world is on a tightrope, with the Cold War between the US and Russia dragging on into its fourth decade. We are under constant threat of

nuclear war, thanks to the constant tension caused by the Race to the moon. On the surface of the planet, humanity faces the challenges of overpopulation, scarce resources, and a world on the brink of being hot enough to boil us all. With the discovery of nuclear powered rockets, mankind has the opportunity to explore the stars, but at a heavy cost. Relying on nuclear-fusion technology, scientists experiment in the usage of isotopes such as nitrogen-14 and tritium, creating extraordinary feats of engineering. One such engine is the N2I-system, a fusion engine that can generate super-advanced high-yield thermonuclear explosions. Stoked with an unlimited source of clean energy, capable of providing sustenance to the human race in the event of an apocalyptic nuclear war. The invention of the system unlocks a new frontier, as mankind starts to build its own space ship. The N2I-Project was born. After the successful test of the first N2I-engine, the Russian and American governments start competing for funding and the

ownership of the technology. To be able to travel to distant worlds will be the ultimate prize. In the end, it will be the largest shockwave from an N2I-engine that will be creating a new world in the deep reaches of space. "The days when we were able to travel to the stars in the blink of an eye are gone. The days when we can own them are about to begin." Game features: • Play as 2 characters - which includes: - US Navy Captain Jack - Soviet Navy Captain Sasha - Make your own battleship and battle it out with 3 AI players - 3 missions in different locations in the US, Soviet Union, and Russia • Control the large capital vessel with multiple sections for the crew, cargo, research and weapons • Explore the landscape, navigate the waters, fly the skies, and fight the enemy on land and in the sea • A first-person experience driven by combined 3D and real-time graphics • Form tactical groups and strategize your crew on board to survive the most challenging battles • Unique mechanics that make every second of gameplay challenging – Allied

and enemy ships may be under a global nuclear attack, creating an unprecedented panic among c9d1549cdd

Spoiler (click to show/hide) It has been ten years since the disappearance of Elif. She hasn't been seen or heard from since. Due to the trauma she went through when she was first gone, she has trouble dealing with things emotionally. It is up to you to find her before it is too late.Keep a good lookout for the girl in the red sweater. There is nothing you can do to get her back. Instead, it is your responsibility to help yourself and your mother live on. Will you be strong enough? Dev Blog Bottle: Pilgrim Redux: Spoiler (click to show/hide) Pilgrim Redux - Road to Waterfall is a game I originally started back in January of 2012. Though I was pleased with the initial release and the fan feedback, it was clear that I was missing something. I want to play around with the art style, presentation, music, the title screen, and just plain polish the game. When I wrote that article, I was hoping that if I wrote more about it, people would play it. So I pitched an update to make the core gameplay more streamlined and enjoyably walkable, while still having the same puzzle elements that we know and love. So it is with a bit of trepidation that I'm releasing the update that I think should be the final result of the update, rather than the original. Let's have a walk around...Every year, at the same time, a man makes a personal pilgrimage from the top of a mountain to a beach far below. Bottle: Pilgrim is a story of loss, regret and redemption, which reminds us that while we cannot change the things we have done, we can always learn from our mistakes. Every day he leaves his home, trekking over mountains and rivers for nearly two weeks. When he arrives at the ocean, he is overcome with the beauty of the scenery, as well as its solemnity. It is a place he has always wanted to visit. As he stands at the water's edge, remembering a fateful journey and a choice he regrets, he looks to the sky. On this day, on this mountain, he will leave behind all he ever knew, and all that he has lost. He will never look back. The man in the red sweater is your grandfather. You've never met him, but you know he's out there somewhere, and you know he's looking for you. The only problem is, you are not sure you want to be found. Why don

presents The Songs and The Circle is a beautiful new album from Broken Baby, and it's truly is a cohesive piece of art. "It felt good to write again after a long while and I'm happy with the outcome," says singer/guitarist Chris Nathan. "The album shows I can write songs that reach out to a wide listenership as well as go in my direct hardcore tendencies. There are so many experiences to be found in the songs, you can use them to pull inspiration from." Ex-members of Triptych and Of Siberian Origin, Broken Baby are a growing force of heavy music that refuses to be pigeon-holed into a genre. They've built an impressive reputation over the years as a place where talent is fostered and the musical tastes cut across the genres, making for a strong, on-point variety. From hymn-sounding white-metal ragers to the disaffected, desperate vibe of noise on "Ghost Holes in the Heart" and "Ground Uprising," Broken Baby use their wide-ranging influences to create a sound that is cohesive and stripped down. "There's

really no need to go into so much detail about our background," says Nathan. "Maybe on a debut we thought it was enough to just be ourselves, but after so many years it still makes sense for us to say it. People can make up any stories they want but in reality we're just ourselves. We're not trying to sound like anyone else, we just like what we like." It's safe to say the guys are going places – and it all starts here. "The songs were written in a series of different times over a few years," says Nathan. "I had put these songs to bed for a long time, so I wanted to finish it off the way I originally intended it to be. "We decided to go with two different themes throughout; I wanted to make a record with a slight black metal tone and put another spin on things, and I really like the lyrics of 'The Pale Water Glass' and the alternative tone some of the songs take. The album closes in with 'Clay Boy' which is a guitar driven song in atmosphere form, and the first of the double vocal parts towards the end. "I like the atmosphere of the closing
