Get FIFA for Windows 10 Get FIFA for Windows 10 FIFA is EA Sports' popular sports game franchise. For more information on FIFA, visit FIFA.com and follow us on Facebook.com/FIFA, Twitter, Instagram and YouTube. FIFA for Windows 10 FIFA for Windows 10 Powered by Football™, EA SPORTS™ FIFA 22 brings the game even closer to the real thing with fundamental gameplay advances and a new season of innovation across every mode. We're introducing a new season of gameplay improvements. In FIFA 22, we are revamping our defensive intelligence. Realism is our key focus in FIFA, and we'll also be bringing a number of significant gameplay improvements to our cover and dribbling systems.

Improvements to the Cover System There's more responsiveness and accuracy to the feeling of how defenders and goalkeepers react. Players now fall correctly and intelligently into position, and stop moving before impacting the ball, if they have the chance. A defender can pull off a beautiful one-on-one save if he senses that he has a chance to stop the ball. Goalkeepers now adjust to when the ball is whipped in more successfully if it's slightly mis-hit, or it hits a defender first. The best defenders will use their feet with panache to force the ball out with a minimum of contact. On top of these fundamental gameplay advancements to the cover system, we're adding new cover animations. Defenders can now slide towards the ball, and keep making progress towards the goal, before stopping when they reach the edge of their 'hedge'. A sliding defender is more realistic to the way a defender would move, while also making players more reactive to the position of the ball in the air.

Matchday Improvements In the all-new Live Events update, we're bringing a number of improvements to the live team set-up, and the ability to edit more in-match formations and line-ups. Goalkeepers will now be able to adjust their body shape via the goal mouth line indicator. There's now a match page that shows a summary of your team in game, alongside some extra stats. Teams are now shown correctly under the Squad section of the match page. In a One to One match, you'll now see which team has the ball
