Crypt is a software application designed to secure your files and folders on your computer. With Crypt, you can encrypt and decrypt files and folders and also create a code to protect files, folders and all data stored on your computer. With this feature you can keep any information private or confidential while protecting it from unauthorized access. If you have a password for your documents, you can easily view or edit them with a simple pass-code or a key. Crypt will never reveal your password to anyone because it will ask you for your password when you try to access or open the files or folder. Now encrypt files and folders anytime. Crypt will ask you for a password when you try to access a file or folder that you are trying to protect with it. You can also use the password to protect other files and folders or to make their contents accessible only by using the same password. Crypt helps you to store your private and confidential information securely. Like other popular data encryption applications, Crypt's inner workings uses mathematical calculations (such as the RSA algorithm) and so it won't work on older computers or with older operating systems (such as Microsoft Windows 9x and older). Crypt will protect your confidential data by encrypting any file or folder that you want to protect. Make sure that you select the type of password that you want to protect your data. The pass-code that you set is the encryption password. Now Crypt can protect your files and folders from unauthorized users. When you are going to protect your data, you need to decide if you want to protect the data with a single pass-code or with multiple pass-codes. Multiple pass-codes may be necessary when you want to protect your data with separate pass-codes. Crypt comes with a built-in feature to create a code to protect files, folders and all data stored on your computer. These codes are called protection codes. You can also use a password to protect files, folders and all data stored on your computer. Protect files with a code and protect folders with a code. Use protection code to make your files and folders protected. You can also use a password to protect files, folders and all data stored on your computer. Protect files with a code and protect folders with a code. Crypt uses an encryption algorithm to encrypt files and folders. You can use the code feature to protect files, folders and all data stored on your computer. You can also set the file or folder to be encrypted.

Download A wonderful little icon pack called Cuti Icon Set is up for grabs on Freesound. The free download comes in a.zip archive that contains 4 different icon packs (ice, graphic, cairo and pyxel), with a total of 148 icons for you to view and/or download. The recommended operating system is Windows 98/ME/NT4/95, but there is also information regarding versions of Linux, and OS X. The icon packs are compatible with Windows Vista, and Windows 7, so they should probably be fine with XP as well. Installing the icon packs To install the packs, extract the contents of the.zip archive to the desired directory. The folder structure will appear like this: . -- Cuti Icon Set ---- ice.png ---- graphic.png ---- cairo.png ---- pyxel.png The Ice Icon Set is especially neat, with four 50x50 images that work well with Windows Vista, 7, and 8, along with a variety of other computers that support XP. Ice also has multi-color and gradients, with a total of 24. It is available in the 4 different formats that the other icon packs are, so you can utilize the full potential of the pack. The graphic icon set contains colorful icons made up of a combination of the following colors: blue, red, green, yellow, brown, black, and white. There are a total of 80 icons, with each one measuring in dimensions of 50x50 pixels. Graphic also has gradients, and multi-color icons, with a total of 8. It also supports most of the same operating systems that the other icons support. The cairo icons are a neat collection, containing 24 icons for you to use. They are all.png files, and come in 4 different formats. There are a total of 8 icon styles: flat, flat-glass, shaded, and shaded-glass. They offer a total of 4 colors: flat-green, flat-red, flat-blue, flat-yellow. Pixie XL is a collection of 57 icons. All of them are.png files, and they support the following operating systems: Linux, Mac OS, Windows 98/ME/NT4
