CopyIP is lightweight program that lets you save your public IPv4 and IPv6 addresses to clipboard. It is portable and free of dependencies so you can easily copy the IP address from anywhere over Internet. Features: 1. Connect to your Dynamic IP Address and retrieve its Public IP. 2. Specify a folder or save your IP address to clipboard for future reference. 3. Displays Public IP in friendly manner. 4. Click OK to copy IP address to clipboard. 5. Supports IPv4 and IPv6 address. 6. Pasting the IP Address to any document, text editor, spreadsheet, etc. 7. No

installation is required and there is no need to modify your Windows registry. 8. Free of dependencies. 9. Simple interface, requires no administration rights. 10. Auto-update feature..set(R.id.txtUserName, name); txtUsername.setError("Username is required"); return; } txtUsername.setError(null); showDialog(); } @Override public void onCancelled(@NonNull DatabaseError databaseError) { // Failed to read value } }); As, I am setting the user name by using user name.setText(usernametext.getText().toString()), I am unable to figure out why the data is not being read.

It is giving me the error as java.lang.NullPointerException: Attempt to invoke virtual method 'void android.widget.EditText.setText(java.lang.CharSequence)' on a null

What's New in the AS-CopyIP?

CopyIP is an application that will help you get your Public IP Address and copy it to the Windows Clipboard. REQUIREMENTS: Windows XP (32-bit) and Windows 7 (32-bit) or higher are strongly recommended, no need to add this program on your home computer. Windows Vista (32-bit) is required for the Internet-capable webcam demo. RECOMMENDED: CopyIP is

the perfect tool to quickly grab your Public IP Address and paste it wherever you want. BENEFITS: Powerful, portable, lightweight and saves time. Just download this handy application from AS-CopyIP, it's FREE, and it's a tool you will definitely love. Note: An internet connection is required. Screenshots: Have you ever thought about backup your important documents by using a Cloud service? If you do, ZBackup is the perfect solution for you. It requires you to only choose the folder that you would like to backup, and then set it to start automatically. There are no other settings to be done, so the best

part is that it's free! Things you can do with ZBackup: To protect your personal documents/ files/ media content, or to start adding a protection layer on your removable media device. - Backup, protect or rip/burn your media devices. - Create a backup of your files/data/media using removable media, and protect your internet connection. - Create a backup of your system, including the registry, the files and the operating system. - Back up your home folders, so if the system suffers a crash you have your important files with you. - Create a backup of your removable media, and use it in a different computer, so you can access your

data easily when you need. -...and of course you can create a local backup of your photos. Main features: - Automatic backup of your important folders/files/media devices. - Time and frequency scheduling options, allowing you to choose how often you want the backup to be run. - Option to set a daily time for the backup and then only run it when it's time. - Option to set a weekly time for the backup and then only run it when it's time. - Option to run the backup when the computer is idle or not. - Back up your removable media devices. - Support for Zip, RAR, 7

System Requirements:

◆CPU: Intel 2.6 GHz or higher or higher ◆RAM: 4 GB or higher ◆Hard Disk: 10 GB or higher ◆DirectX: Version 9 Virus Protection: Microsoft Security Essentials, AVG Anti-Virus Installation: Please download and install this game manually. (1). Install the DirectX Version 9 2). Install the game and patch (2). Launch the game. 3). Click the "ESC" key to get
