Following the events of the Hegemony Civil War on Eador, forces aligned to the New Hegemony have landed on the southern continent to purge the rebels and the remnants of their former Allies. They are vanguard of the Onslaught, an invasion force of mortal soldiers, reinforced with magical force field projectors and airships called war machines. Their goal is to purge Eador of the rebels and their allies who are rebels to the New Hegemony, and return their colony to New Hegemony rule, or eradicate them from Eador if necessary. The New Hegemony currently has two main methods of exterminating its enemies. One is the use of magical force field projectors to superheat matter of the target, vaporizing all living matter. Another is to use their war machines to punch large holes in the ground,

---

burying the opposition. If they suspect that the target is a true ally, the New Hegemony will employ the second method, using war machines to punch large holes in the ground and bury the enemy army. The war machine has the impressive ability to transport far larger forces than needed, as seen with the usage of the ones they have found in Eador. They can transport blocks of materials to locations of strategic importance using their reinforced body, and a large part of their strength is based on their ability to create and maintain a war machine. Anachronism Players should be aware that this is a fan-made patch and may not work perfectly on official or private servers. Not all upgrades are translated correctly and it's impossible to make patches for everything. However, these enhancements should be relevant. Finally, we disclaim all responsibilities for any damages that occur with the usage of this update.

**Allied Forces: Community Domination** The community dominator has been "updated". It will now provide buff and debuff effects to groups of units, allowing a team-based tactic. A player can only have one party for each character.

**The Art of “Tower of Shirin”** We like to say that we have a temple/fairy tale. This is how we describe the aesthetic composition of the building “Tower of Shirin” located on the top of a mountain NIRI. The only small difference between the epic structure of the temple of “Tower of Shirin” and the story of “Tower of the Sun” by Edgar Allan Poe - doomsday fairy tales. We have tried to put the description of the artwork in short and make it understandable for you. The three stages of the construction of the Tower of Shirin are pictured below. The first stage on site we called the secret Mountain of Shirin on which would be built the tower in the center of desert. The second stage will be the first construction of the magnificent Tower which is single and two layers layered as a giant sculpture. After that stage the basement was built here where the pioneer will start to put the stones of the tower. A location for plowing out and their own farm implements. By this stage a “Horizon line” is made which will become the distinctive boundary of the stone blocks. Even in the water holes where they will dig the foundations or the houses, one can see the graphical pattern in a form of the horizon line. This pattern is sculpted in a consistency of the “Sun” shaped pattern, according to the mathematical structures. Therefore, when there is a delineation where the deepness of the horizon line will be sculpted, there will also be a delineation of “sun” formed in the inner direction of the stone blocks. The third stage will be the base of the giant sculpture. Stone blocks that are laid down and covered together with cement and plaster will be the basic structure of the base of the sculpture. These pinnacles of a mathematical pattern would contribute the sculpture to the “sun shape” aesthetic of the entire structure. By this stage the sculpture will be almost completed. When the construction was done, it was examined and approved by Emad Yuval, the Director General of the Archaeological Institute of Iran. The research team of the Institute ascended the 1350 meter high mountain of Terkieh. The 31 meter high mother sculpture is known as “Shirin Ghaleh” and she is noted as a unique prehistoric statue of the metal age. Information about the

The Fantasy World is a major continent in the SRPG game. It is extremely famous for its advanced manufacturing technology. The people here regard themselves as kings of the world. This continent has five great kingdoms: Weihai, Lushun, Jiangnan, Nanfang, and Yunnan. Of the five kingdoms, Nanfang kingdom is the most strong and prosperous. The players who lead their army to Nanfang kingdom can obtain extremely valuable items. A fantasy world with 17 independent countries. Users can interact with each other and take war games, trade, and even marriages in the Fantasy World! Approach Points: There are four kinds of army in the Fantasy World. They include the Army of Light, the Army of Swords, the Army of Ghosts, and the Army of the Heavens. Different from the real world, you can only choose your army's approach point and then encounter different battles in the Fantasy World. The Army of Light users can upgrade their weapons and armor. They are well suited to combat with the Army of Swords. However, as compared to their counterparts, the Army of Light users cannot use magic at all. The Army of Swords are well-

---

versed in the usage of magic and swords. Their strongest weapons are swords. Therefore, the Army of Swords can easily fight against the army of the Heavens. The Army of Ghosts are well-versed in using scythes and guns. Their strongest weapons are guns. However, the Army of Ghosts lack armor and cannot use magic. The Army of the Heavens are well-versed in the usage of magic and heavenly weapons.

However, their strongest weapons are magical weapons. Their strongest magic is the Heavenly Thunderbolt Magic. As compared to the other three kinds of armies, the army of the Heavens has the most powerful attack in the Fantasy World. The Army of the Heavens are the only army in the Fantasy World that can use other players' approach points and earn gold. It is definitely a dangerous army to encounter.
