Note Most image editing programs have plug-ins that enable you to use functions that are not natively supported in the application. For example, Lightroom, Photoshop, and XnView can use plug-ins to access video functionality. Each of these products comes with a similar collection of plug-ins that enables you to perform additional image editing tasks. # Chapter 3: Color and Grading ## Preparation In Chapter 2, you learned about all the different ways in which you can work with images in Photoshop. Because of the wide variety of tools for modifying or visualizing your files, you must prepare each image in a similar way.

From helicopter safety to pilot training, these are the companies leading the way in aviation innovation. In the business of flight, things are not always what they seem. That is one of the things that makes flying such an incredible experience. But there are also countless technological, commercial, human, and regulatory challenges that surround the practice of flying. As such, the airline industry is a breeding ground for innovation and numerous companies continue to innovate in various ways. The evolution of aviation started before the Wright brothers' first successful flight in 1903. It continued through the early years of commercial aviation in the 1910s, and into the first airmail routes in the 1920s. Recently, aviation technology has continued to develop, with the introduction of automated flight and the rise of autonomous flying vehicles. In the near future, we could see radical changes as well, as we move towards a future of "flying cars" and even jetpack-powered air travel. Considering the diverse nature of the industry, it is no wonder that there are many companies looking to develop and implement new technologies for aviation. Here are a few of the industry's most notable innovators.

iRobot Corporation Known for their line of robot vacuum cleaners, iRobot Corporation also has a long history of developing robotic flight systems, including the Microdrone, Roomba, and PackBot. All three of these products are used to perform basic functions and survey properties for real estate and building owners. More recently, the company is working on developing what it calls "navigation drones" that can autonomously detect and track objects of interest—such as geofences.

Avnet Keeping up with the trends of modern business, retail giant Avnet recently announced a number of new products and services centered around the IoT. The company recently released IoT products for shopping, airline, and automotive sectors. In addition, it created an IoT Framework for retail.

Innovation Lab Known for its ability to tackle complex technological problems, the Innovation Lab at Boeing is one of the most well-known corporations in the world. The company has developed software solutions for aerospace, commercial and defense applications, focusing on complex computer systems and cybersecurity. Recently, it announced collaboration with BAE Systems to develop the autonomous systems that will be used in unmanned aircraft in the future.

Volocopter Already known as the "flying taxi" company, the German startup Volocopter is looking to make

Q: What can be the values of $\hat{v} \in \text{R}^3$ which follow from a series of linear equations. The question I have troubles with is the following: Suppose we are

given a set of linear equations in the unknowns x,y,z . We also know that: $x=v_1$
 $y=v_2$ $z=v_3$ What can be the values of $\hat{v} \in \textbf{R}^3$ which
follow from this set of linear equations? (Explicitly) what is v_1,v_2,v_3 ? I am
aware of the system of equations in more general form where we have n
equations, m variables and any $m \times n$ matrix to apply them. In my specific
case, i.e $n=3,m=2$, the matrix is 2×3 and so the solution space must be
 3 -dimensional. I have tried to solve them in all possible ways but I don't see any
result which really fits my question. The best I could get is: $v_1=\frac{1}{2}v_2 +$
 $\frac{\sqrt{3}}{2} v_3$ If it matters I am thinking about a complex case where
 v_1,v_2,v_3 are complex numbers. A: After talking with Gregory, I am on the road
to finding the answer in the form: $v_1= \frac{1}{2}v_2 - \frac{\sqrt{3}}{2}v_3$
and $v_2= \frac{1}{2}v_3 + \frac{\sqrt{3}}{2}v_1$ I am not able to explain why.
Maybe this can be helpful to someone. But police are still investigating the shooting
to determine if the West End Alliance's handling of the incident will be considered a
breach of the Police Act. The group later sent a letter of apology to the victim's
family, saying they take responsibility for any "error". The incident triggered outrage
on social media, with
