The present disclosure relates to an image forming apparatus and a control method of the same. In an image forming apparatus, such as an MFP (Multi Function Peripheral), a serial communication interface has been widely used in which a firmware update command is sent from a printer function expansion apparatus to the image forming apparatus to perform the update. However, the existing serial communication interface has a problem in that, when the firmware is updated, the user needs to prepare and connect the printers function expansion apparatus to the

image forming apparatus to send the firmware update command. Further, the image forming apparatus is unable to automatically update the firmware. What * The base salaries for California state employees were cut by 4% in January, but what happens on April 1 when the cuts are finally finalized and made retroactive to the beginning of the year? * Union chief says legislation to cap union fees may face more legislative changes * The salary board came back to me with its latest proposal, and it needs help. Dec 12, 2008 Today's * Some government agencies ran out of money in the early part of the month. And every day it seems like there's more and more in the way of financial problems. * And it didn't take long for another
