For the past five years, Weirdpoint Studios has been transforming the PC into a first person survival experience for all ages. Since the company's premiere of Hollow Knight, they have created three amazing games: Octodad: Dadliest Catch, The Quest of Dood and The Witness. The company is currently working on Dystopia Nightmare 2, a survival horror game focusing on hardcore action, puzzle solving and exploration. Octodad is a hybrid of platformer and reverse tower defense. It tells a story through split-screen gameplay in which Dad (a hip, clumsy ottoman made of synthetic furniture) suffers from a terrible secret that only he can see and only he can fix: his inner companion and helper robot, Octodad. Dad's faithful friend, Octodad, exhibits human qualities such as expressions and behavior, and their bond helps fill a void left by the loss of his human family. The gameplay, as you'd expect, takes place in Octodad's alternate dimension. He tries to fix daily routine mishaps, as well as strange events such as strange sights, loopy code, and more. These mix with the usual platforming, exploring, and puzzle-solving to create a rare blend of mechanics - one that blends the tower defense aspects of the genre with the platforming and obstacle avoidance (without the running needed for a typical tower defense) and what's required in a first-person survival game. Key Features: - A unique story-driven, puzzle solving experience. - Breathtaking visuals and a unique art style. - Varied gameplay mechanics. - A powerful voice-over script and immersive music bring the game to life. About Strange Thing Studios: Strange Thing Studios is a new studio formed from the ashes of Weirdpoint Studios and is composed of some of the same minds behind Hollow Knight, Octodad: Dadliest Catch, The Quest of Dood, and The Witness. Strange Thing is focused on a new team-oriented and coordinated group of people creating interesting and innovative games that blend fresh experiences with close ties to classics. The studio is currently developing Dystopia Nightmare 2, a survival horror game focused on hardcore action, puzzle solving, exploration, and horror. Holiday Jigsaw Thanksgiving Day Game Review:

Holiday Jigsaw is a great Thanksgiving Day puzzle game. There are about 10 levels for you to solve in the simple gameplay. If you get stuck in a difficult level, you can turn it to easy for a while. The 10 levels are fair; they span from easy to hard. The actual jigsaw puzzle's pieces are bigger than they are on most game boards: they're 8.5x11 and they're just big enough to fit multiple pieces onto a game board. This means that while the pieces might be spread all over the board, there are more of them than you'd have in other tower games, making it easy to solve. You can solve a level at your own pace, and the game refrains from making you rush through it. The nice thing about this game, is that each level if you solve it becomes a new unlocked level, and so on. Though you can change the difficulty to easy if you aren't up to the game, there are no timed levels that can prevent you from playing a level if you like it. Instead, you unlock new levels and unlockable bonuses as you finish levels. In this regard, the game has a good difficulty, but it could be bumped up because certain game pieces serve as locks that require you to solve them before you can access a new level. Locking certain blocks after a certain number of moves can make games awfully hard to complete. Overall the holiday jigsaw is a very fun game and a nice change of pace from many puzzle games. The developers did a great job of balancing the difficulty so that the game can be solved at multiple levels without frustrating users.

Online Multiplayer:

Holiday jigsaw Thanksgiving Day can be played offline and online. If you don't have friends to play with online, the all the game graphics will change

A Little About The GameThe game is a follow up to the game Dr. OPTIMA: The City Beneath from Gameloft. It is not much different than the original DROD: Journey to Rooted Hold except that it is also a city building game. The gameplay is basically the same, but the game is more adventurous. When you begin, you can choose one of five different characters. Each of them has a different element that they can use to heal, or to attack. You must also choose one of four level elements; wind, fire, earth, and water. Each element will affect the world in a certain way, but the level will always change if you use a certain element on a block. For example, if you use Wind on a Wind block, the level will change to Cloud. It will change like this until you pick the correct level that fits. You can also switch the Fire block to attack if you are out of healing items. When you have chosen your level, you can start building blocks. The game has different game modes that you can choose. You can just build a city or you can try to make the highest score by making a tower of blocks that reach the sky. You can play this game on different difficulties, or you can just have a more difficult mode. The city is built from eight different types of blocks. As you play the game, you can change the city. You can move blocks around and change the dimensions of your city. The blocks are in eight different sizes. The blocks with the big letters are the ones that you can move. The blocks that have medium or small letters have different shapes and abilities. As you play the game, the city begins to rain. In between the rain you can eat blocks to regain health. If you begin to run out of health, you can go to a secret block that will heal you. But if you go into the underground block, you will die. When you die, you can change into any of your other characters, but you will lose all your progress, and you will have to start the game over again. Characters There are five different characters that you can choose from when you begin the game. Each of them has different abilities. Their special abilities are represented by different colors. Eric: He has a stronger Fire ability, but he can also use a block to recover health. Sakura: She has Wind magic. She can use

[Doomsday] Death’s Gate 1x Apocalypse Zombie 1x Ravaged 1x Vanguard 1x Tidecaller 1x Cypress Sceptre Death’s Gate Out of Stock (1310 Comics) Edition Size: 500 Regular Price: N/A The Doomsday Troopers are here to bring you the final moments of blissful ignorance through the Death’s Gate comic into the gruesome onslaught of reality. Get every Army of the Apokalips member you can get your grubby paws on so you can stand against the Gloom Gloomers and that thing in the line. You better be looking, ‘cause things are about to get real personal at the “Battle for Apokalips.” 1: The Apocalypse Zombie sashays up to the Troopers to demand payment for their hard work. Without a second of hesitation, Javelin Treads smashes him with a mighty hammer, allowing him to puff himself up into a giant purple golem. The Troopers hoist him on their shoulders and head back out into the mushroom fields. The Troopers begin battling. 2: In the first exchange, the Troopers smash the first zombie, but his sheer size brings him too close to Javelin Treads. Javelin Treads trips him with his axe, destroying his knee. The other zombies challenge the now uselessly angered Troopers to a duel. The first zombie slashes away at Javelin Treads, but the Troopers manage to scatter them with icy blasts. The Troopers shatter the clubs the Gloomers use for battle, then they shoot down several zombies with Javelin Treads’ blaster. 3: Dusktrooper, a fanatically devoted Dusktrooper, smashes a chunk of road nearly clear of the terrible golem. 4: The other Troopers struggle to fend off the huge punching mob attacking them, but Javelin Treads charges up the one large zombie and bloodily rips his head off. 5: As the confrontation drags on, Dusktrooper rounds up several ghouls and tries to create his own undead legion, but he inadvertently feeds on his own comrades’ fear. When Dusktrooper finally splits apart some of his allies, the rest of the Troopers board his disappearing body, and begin to strip him to shreds
