Forest Legends: The Call of Love blends RPG and puzzle gameplay into a magical story of love and destiny. The story unfolds in beautiful hand-painted anime-style illustrations, while puzzling and turn-based battles take place in a richly detailed 3D world. The game places you in the role of Eveline, a young girl who has inherited the power to see and interact with all living things, and that includes people and animals. She is the chosen one to unite a divided world. To do this, she must travel through a fantastical forest and overcome the secrets and trials awaiting her. Forest Legends is a fantasy puzzle-adventure game with elements of roleplaying and visual novels. It has over 100 unique locations that will take a lot of exploring to uncover all the secrets. Every player should experience the game in its complete form - there are secrets and surprises at every turn. And as you make your way through the game, you will work together with a handful of allies: a talking scarecrow, a raven, a mysterious pixie, a magic-wielding healer, a friendly wolf and more. Your actions and decisions have consequences, and each one will have a bearing on the game's plot. You can meet and interact with as many characters as you want, but only the one you marry and invite into your heart will be with you through to the end of the story. Can you hear the call? You will encounter a variety of creatures, many of which will do battle against you, such as wolves, bears, and spiders. But defeating these animals is no simple task - they can die, and they have a number of different attacks. To win a fight, you will have to have the right equipment equipped and use the correct strategy. You will have to kill the toughest enemies using the correct tools - and that can be a bit tricky. The game features both traditional RPG elements and real-time combat gameplay, and you

can mix and match to create your ultimate adventurer. The character development is an exciting opportunity to improve yourself, and changing your abilities may cause the game to shift its environment. You can customize a large variety of armor, tools, weapons, clothing, and objects. And you can use these items to solve puzzles. As you explore the forest, you will find useful items that enhance your fighting abilities and improve your combat system. You may also find heart-shaped tokens, use them to buy special items, and use their powers to enhance your character. This is a game about character, and your

A: I have tried it and in addition to the solution posted by davidwalsh.com, I've also done the following: Clearing all browser data (clearCookies(), clearCache(), clearProcessData()) Deleting the cache folder (C:\Users\MyID\AppData\Local\Google\Chrome\User Data\Default\Cache \ and C:\Users\MyID\AppData\Local\Google\Chrome\User Data\Default\Session Data) Reinstalling Chrome Erasing the local app data: C:\Users\MyID\AppData\Local\Google\Chrome\User Data\Default\Data Q: How to convert a TreeSet of FlightID to a map of ID to score Having a FlightID which I'm saving in a TreeSet how can I convert this to a map where the key would be the FlightID and the value would be the score that the ID has? The problem that I'm facing is that this map could also have a key for the same FlightID, and in this case the key would be the lower FlightID in the TreeSet. This way I can keep track which candidates have the same ID and have the higher Flight score
