Static macros are predefined in the application's language and can be loaded or deleted in the application's Macro Manager. Dynamic macros are defined on the fly and can be created, edited, or deleted. AutoCAD 2007 introduced a new macro recorder feature that creates a static macro automatically, and a new Dynamic Macro Manager. A new macro editing mode was added to the Macro Properties Dialog (Tools → Macro Properties). Dynamic macros that are created in this mode can be saved as static macros by using the Save feature. Dynamic macros that are created using the new macro recorder feature can be saved to static macros by using the Save feature. Dynamic macros are also used to write documentation and provide step-by-step guidance on the use of the application.
