On the desktop, AutoCAD enables users to create 2D diagrams, 3D models and digital sheet metal designs. With advanced drawing and editing tools, AutoCAD enables users to draw accurate and precise geometrical designs quickly and easily. Users can also define objects using features such as snap, dimension and annotation lines and points. The mobile and web versions of AutoCAD enable users to create and edit drawings in a browser, send drawings via email and access and print drawings from anywhere. Methodology and Features AutoCAD includes a variety of methods to create diagrams, including 2D drafting, 3D modelling, digital sheet metal, and many others. Commonly used methods include geometric drafting, point and path drawing, and object-based diagramming. Once you have created your drawings, AutoCAD allows you to edit them. This includes modifying and editing features, such as the geometric, linework and annotation properties. The changes you make to the drawing are stored. Your drawings can be saved as text, editable image, PostScript or PDF files. AutoCAD can be used to import and export data from other programs. Once you have edited your drawings and saved them, you can print them, and you can send the drawings to another person or organization. Overview New features and methods Connections between products Ease of use Cost Ease of use AutoCAD offers tools and methods that enable you to create drawings quickly and easily. The methods you use in AutoCAD depend on the type of drawing you want to create. There are two methods used to create diagrams: geometric drafting and object-based diagramming. Geometric drafting methods use elements such as lines, arcs, circles, ellipses and polylines. Object-based diagramming methods draw objects directly within the drawing area. Each drawing is either a 2D drawing or 3D model. An object in AutoCAD is a 2D or 3D object, a feature (for example, the shadow of an object), or a view (for example, a mirror or window view). The objects you create using geometric drafting methods are usually found in AutoCAD after you save the drawing. If you open your drawing on a different computer, you need to open it again using the geometric drafting methods. You can open the drawing as a 2D or 3D drawing or as a Post

The team was introduced to the traditional head-and-shoulders greeting at an official press conference before their final pool-play match against Italy on Sunday, with All Blacks coach Steve Hansen insisting it was not a cultural appropriation. The haka is an ancient practice originally derived from the Māori language. It's a powerful pre-game greeting and expression of welcome to a territory, or a greeting between tribes, in which the opposing team stands as a wall between players of opposing clans. Video: Haka Aotearoa - Maori Warrior Haka "We have been greeted warmly by the group and we are looking forward to the match tomorrow against Italy," Hansen said. "We are very conscious of the cultural obligations we have under the Webb Ellis trophy. It is an expression of Māori culture." The haka has been in the All Blacks squad since 1986. Regards, Matt Pity the manager of a U.K. bank, when three thieves will attempt to pull off a $23 million heist this year. That's according to the World Federation of Diamond Bourses' top ten list of the year's most valuable jewelry heists. In all, there were 34 heists worth more than $10 million in 2012, the WSIB informed the World Diamond Council in a press release. The heists with the most bang for the buck were the heist at the Ezzit luxury hotel in Saudi Arabia, the rubies and sapphires from the Bulgari store in New York and the diamonds from the world-famous Cartier vault in France, followed by the $5.2 million burglary of the Coeur Sportif jeweler in Belgium. Aside from all the bling, those three burglaries happened in three separate, seemingly unrelated countries. Most of the heists took place in European countries, but South Africa, the U.S. and the Middle East also got some attention, the WSIB explained. Like many heists, most of the jewel heists happen during business hours. That means that businesses with their facilities on the ground floor could be more vulnerable than ones on the upper floors. The stolen gems could be recovered, but they could still fetch a high price when sold. The WSIB pointed out that "the global market is healthy" and the number of jewel thieves was down from the levels in 2008. But the value of the jewelry stolen still held the same importance in 2012 as in 2008, the
