I need to convert an 2-dimensional array into 1-dimensional array and then it will

be stored in some other arrays. But if the array is square it will not be converted, otherwise it will be converted. For example, I have a square matrix which has only zeroes. If I convert this array into some 1-dimensional array the converted array will contain only the values zero and one. How can I do this? A: Is this your question?

```
int** squareArray; int*
nonSquareArray; int size =
squareArray->size(); int* temp =
new int[size]; for(int i=0; i
```
