16 on a Mid 2012 MacBook Pro with Adobe CS 6. I'm pretty I often use Acrobat X, sometimes InDesign & Illustrator & Photoshop is rare, but they all work great on . ¼Torrent. (I don't use iTunes.) I know I can switch from µTorrent to XBMC, but is there a way to use µTorrent as a web browser? I would rather not install ¼Torrent or any other browser app. I'd rather be able to just say "change page" and navigate to another location I'm not entirely sure if this is possible, especially
