He was sentenced to 23 years in prison. He maintains he is innocent and should be released. He is currently confined at the Federal Correctional Institution Victorville, California. Invited to and admitted to the United States District Court for the Southern District of New York, argued that he was mistreated and arrested. He was sentenced to 23 years in prison. He maintains he is innocent and should be released. He is currently confined at the Federal Correctional Institution Victorville, California.Q: How to define aliases in boost::python? I use boost::python to wrap some C++ classes. Now I'd like to add some aliases for a namespace or class. The python documentation says that this is possible, however, I cannot find out, how this is done in the C++ wrapper. Any idea? A: Actually there is no need to alias a namespace in boost::python. Just define a class for the Python class and override the class constructors. struct MyDocWrapper { PyObject_HEAD MyDocWrapper(PyObject* self, PyObject* defs) : PyDocWrapper(defs) { self->ob_f = -1; Py_INCREF(self); } MyDocWrapper(PyObject* self, PyObject* cls) : MyDocWrapper(self c6a93da74d
