March 31, 2006 - (I have only tested this with what I have, which is V5-V6 ps2 ‏‎and gameshark 2 either v3 or v4, and also the original copy of GTA Vice City. It's a pretty good trick and I was really surprised how it works when I got this and it's surprisingly easy to use especially if you know where to go and if you're dealing with things like color tweaking for example leather, etc. You can set this in the project settings to change your character's skin color. You just need to use the GMX plugin. Just put it in the plugins folder in your project folder and open it with XnView plugin.
