column that tells me which courses the student took. I want to update one table with the courses the student took, when I try to update the table, the query shows me an error. Here is my code: UPDATE schooldaten SET schooldaten.studinten WHERE schooldaten.studnummer ='student 1' AND schooldaten.studinten=

'curs1'; This is the error: #1064 - You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'FROM schooldaten SET schooldaten.studinten WHERE schooldaten.studnummer ='su' AND'at line 1 A: You have to tell MySql that

you want to add the data from one table to another table. That's why you must tell MySql what table to update. UPDATE schooldaten, schooldaten.studinten SET schooldaten.studinten=schooldaten.studinten WHERE schooldaten.studnummer ='student 1' AND schooldaten.studinten= 'curs1'; You need to fix

that syntax, anyway (t.stu dinten=schooldaten.studi nten), it's not right, you are updating the table t but you want to update a column of that table. Another problem, if you want to add the same data, you shouldn't update the table, you should insert it. The update command just updates if you want to add information to the

table. You could use a trigger to achieve that. Bye. According to a new study, about 80 percent of Canadians believe that drug use causes mental illness. The study c6a93da74d
