
Sharepoint Server 2013 Product Key Crack WORK

I'm using a Sharepoint 2013 server. I'd like to know the server's license key to confirm if it's a trial or licensed version. I have looked on this portal and found that you cannot use a tool that provides a license key that you could enter online if you were to use it. What if I want to run a trial or trial key and I need to know what steps are taken to do so rather than getting all the details from the server. So how to get the server key to use it If it can be done then what tool do I need to use Thanks Edit:

Download
